# Fruit Ridge Notes

Fruit Ridge Notes  
from Ron Reister  
C.C.A.

Fruit Ridge Notes – Wednesday - July 19 - 2017 - Again...  
From Ronald G Reister!

**Hey Friends .... Doublin-Up on Ya's Today !! ....Just a Couple  
More Key Points ....**

\*\*\*\*For On Your later **Blues** Varieties.... The Pre-Harvest-App of 12  
oz - 16 oz **VitaZyme** and the 1 qt. **MainStay Calcium''S.I.''** really  
makes huge sense....

.....a certain **+++for-sure-pay-back-plus+++**

\*\*\*\*Q & A .... **Yes---**the Da.P.H.I. with ActiGard on **Apples** and  
**Pears** is 60 days. But remember that the A.I. **''Salicylate Acid''** is a  
**''Inert''** ingredient in **Saver**... which is a really cool 2-0-10 with  
some very classy HiTec Proprietary Goodies in it's formulation.....

\*\*\*\*Reminder: **45 Da.PHI** on Kudos and Apogee

\*\*\*\*Q & A.... The **''Parka''** **Sure\*Seal Technology** supplements the  
Cuticle....and this Hydrophobic Formulation is Edible, Colorless, and  
Tasteless.... Exempt from Federal Registration.

The Butch Palmer Crew at **Reality Research in N.Y.** have a  
nifty collection of **Apple-Data-Proof** that Parka improves Marketable  
Yields substantially....by actually repairing some Lenticel damage.....  
And as you Association Members know, the **M.B.G.** Folks have been  
praising the attributes of Parka for years now on **Blues** .....as it  
prevents cracking.

\*\*\*\***So you're almost positive** you read something in a Fruit Ridge  
Notes from Reister, but you can't remember a couple of details for  
sure, and now you can't find it..... ???

So, Check out **''Reisters.Net''** for any-all **archived** Fruit  
Ridge Notes....

\*\*\*\***Remember Friday** the 28th.... a week from this coming Friday .... the **Fruit Ridge Fest** .... Fun--Food--Fellowship-- Michigan Beers and Wines--and some regular Beers 🍺👍 -- Some Classic Cars and Tractors--Some Entertainment--It's gonna be a great place to be from 3pm til 8pm on the 28th of July !!! Look for the huge Tent !!

\*\*\*\***A Grand Old OrganoPhosphate** Insecticide Chemistry .... If you are really struggling with some Woolies or SanJoseScale issues, in your Production or **NonBearing Apple Blocks** .... Consider the **OI Diazinon 50WSP**.... a RUP with a 21 DaPHI... a 4 Da.REI ...For Use @ 1lb-100 Gal but you can do Concentrate=5X=20 G.W.A....and you're allowed 2 Applns. This stuff is very Cost-Effective at \$8-Lb. So... 1 lb.-Ac.- NonBearing....When you do your TRV, you got **\$2** into it...????

Another OrganoPhosphate product still around is Imidan.... but most Folks say that Imidan is quite a bit weaker than this ol Diazinon...?? Gotta remember too...That the 21 Da.PHI doesn't apply to your *NonBearing* ....

Bear in mind that Diazinon is also labeled in **many** various **Fruit Crops** and most **Vegetable** Crops and lots of **Flowers** and **Shrubs**.... Labeled for all of the *Scales...all the Borers... most all Mites...Aphids ... FruitWorms... FireAnts ... MealyBugs ... Maggot... Thrips ... Bud Moth...LeafRollers ...LeafHoppers ... OFM ..... Tip-Moth... Vinegar Flies including SWDs ... Webworms... Whiteflies ... Skeletonizers ... Beetles... Sawfly, Loopers, Leafminer, Slugs, Tent Caterpillars, Wireworms and Cutworms..... Lots of creepy crawlers.*

This is Labeled in nearly all Berry Crops and Stone Fruits as well...and some can use up to 4 Lbs-Ac-Season.....quite a intricately involved Label...

Just sayin.... Kind of a Bargain...I love this stuff.... I just Love Good Deals.

*All the Best ....r*
