Fruit Ridge Notes - All Fruit - Wednesday - April 19 - 2017

Hey Everybody Hoping You are All Well !!!

Thinkn Ahead a bit

******Miticides**..... are Traditionally one of the priciest Pesticide Apps we have to do. We have become accustomed to \$38 - \$45 - \$57 - \$68 per Acre or much more --- We just seem to shrug it off.

The 120-140 Ac.-Guy simply goes ahead and gittsrrdunn ...and then gets the \$7000 - \$8000 - \$9000 invoice, and then just pays it...just taking it all in stride.

My hats off to you guys.

I glanced at one Miticide recommended at 3 - 6 oz-Ac...at full rate it's close to \$100-Ac.!!! And they insist you use a specific spray oil with it. And there's no guarantee you won't have to come back with a second Appln !!! Just Crazy.

But Wait ... What about the Option of 4-Alternate-Center Apps of *Full-Rate*-Miticide around the 1st-2nd-Cover time-frame [on-Apples] that is Labeled for Two-Spotted, McDaniel Spider Mite, European Reds, White Apple LeafHopper and Tentiform LeafMiner.... and that Tank-Mixes with virtually whatever else you're doing ???!!!!???

Andthat is also Labeled on *Tarts and *Sweets and *PlumCots and *Prunes and *Pears and *Plums and *Peaches and *Hops and *Grapes...**All for \$22 per-Acre for both Full-Covers**--- That's 4 **Alt-Centers** ...All of it == **\$22 Total-All-In.**

Please pretty please don't get talked into one of those really pricey ones that may or may not require you to make a 2nd appln thereby getting you to that \$100 - \$130 - \$175 per-acre spending range.

Using **Abamectin 0.15EC** at the Full-Rate of 20 oz-Ac for the maximum seasonal limit of 2 Applicationsgetting you to **40 oz-Total**, is how you gittrrdunn.

I adamantly believe we need to use this Abamectin 0.15EC [AgriMek] until they take it away from us, or until we wear it out. But....This product has been around for 40 years....and hasn't wore out yet.

The REI on most of these Crops is 12 Hrs...with the Days PHI of 28 Days.

Please note that Grapes has a Seasonal Limit of 32oz rather than 40 oz.

Some folks say you should use a Ag-Oil with it....

No!! Absolutely NO !!!

Many of you have proven beyond any shadow of any doubt that the need for oil is absolutely false...pure non-sense. You definitely do not need any Oil.

You instead use a big rate of a top-shelf-quality-**90-10-N.I.S.....** like InSpray-90 or Regulaid or Activator-90. Always use a **InSpray-90** type product whenever somebody starts talkin "Oils".... Always stay far away from any Oils and your life will be much more joyful. We continually and adamantly highly **UnRecommend** any **Oils** ever.

I like **InSpray-90** why ...??? Because we sell it for 50 -60-cents-on-a-dollar compared to the other Top-Shelf-quality 90-10s down the street.

This **Abamectin 0.15EC** is also labeled on just about every Vegetable -- and Melons -- Flowers -- lots of crops. Pretty crazy. Sweet Fancy Moses I love this stuff.

And if you're wondering why the BNR Reps are not talking about Abamectin 0.15EC...??? ...the answer is the **\$22 All-In-for-2 Complete Covers... 4 Alternate-Center-Applns...\$22.**

So....Thats \$22 instead of \$80 per acre. Thats the reason.

Be sure to check with Deanna..... I see on the Agrian.com website where some of these Abamectin 0.15EC's are only legally labeled on Ornamental Trees--Shrubs for here in Michigan....?? We have the correct product here.

Reminder:

The Big MSU-Spring-Spray-Meeting at Patrick and Bill Goodfellows--Tomorrow -- 2267 12 Mile Rd N.W. Sparta 49345 - It's apprx 1/2 mile west of M-37--north side 12 Mile...Be sure to Use the Orchard DriveWay passed the buildings to the west....down by Laubach Ave.

....And May God Bless Your Endeavors
