Fruit Ridge Notes - Blues - Thursday - May 25 - 2017

Greeting All Blues Pals from a Drizzlin & Chilly Fruit Ridge Avenue

Some recent discussion with some Elliott Growers.... Trying to remember the recipe for getting Sweet-Good-Tasting Elliotts Some of you have had awesome results with this Tank-Mix-Recipe....with hugely

happy Customer-Feed-Back about the Flavor of your Elliotts....

--- Here Ya Go....

** **1** Pint-Acre **VitaZyme** at Petal Fall and Repeat at 3 Weeks later and again 5-7 Da.PreHarvest. This is very-Low-Cost---Less than \$8 ??

....and also in the same Tank

** **1 - 2 Lbs-Acre DiKaP**Newer-younger Plantings==1 Lb....Big mature Bushes == 2 Lbs. The 1 lb-Rate = like \$11.00

**There is a huge Bloom in most Blueberry Fields around Muskegon. I'm anxious to see what the Crop-Set will be ...after some pretty

crappy and cold weather for much of the BloomTime.....

?????

**Most Guys are staying focused on the Cankers and Anthracnose controls..... We have a sweet Deal on Abound [a strobie] and also on Tilt [propiconazole--a sterol inhibitor] ...and you all remember that Quilt Xcel is a strobie-combo-propiconazole Product We have all these excellent products at serious savings.... Some of our Fave-Products may have a generic name but you can rest assured they are exactly what you want and

labeled appropriately for blues in Michigan....

And remember CS2005 is a excellent performer on all Bacterial and Fungal Diseases..... and Tank-Mixes with everything I have ever asked it to.

It seems every year someone tells how they got a sweet deal on a product that they thought was the "Same-As" ...and it turned out to be only

labeled for Cotton in Texas....???

...or me....

****As soon as the Bees are out, be sure to be in there with a low-cost-high-efficiency Insecticide Program.**

You're allowed 38.4 oz-per-Season AsanaXL and being a 14 Da.P.H.I., Asana is not all that helpful during Harvest for SWD Controls, right...?? So because it is such a Butt-Kicker and really Cheap....??? I'd be doing at least 2 Apps @ FullRate 9.6 oz [only like \$5-App] saving 2 Apps to play with at 14 Da.PHI.... and I would seriously be thinking of Tank-Mixing-Low-Cost 1 Lb.-Acre Diazinon

50WP with that.... for apprx \$8...  unless of course you have some Finished-Product-Buyers that dont want you to use Diazinon.....??? It almost seems like one of you mentioned earlier

that you might maybe have a problem of that sort...  I know

there is one Cherry Buyer that has an allergy to Diazinon....  And also...

Remember in Blues you are only allowed **1 App**-Season Diazinon 50W ----with a **5 Da.REI**....and a 7 Da.P.H.I.

****Save your Seasonal-Limit [24oz.]--MustangMaxx--6 Apps @ 4 oz.... with a 1 Da.P.H.I..... and your Imidan 70W -- 5 Apps @ 1.33 Lbs with a 3 Da.P.H.I.... for your upcoming War with the miserable no-good-low-life SWDs.**

****I am getting all the latest greatest updates on "Parka"or "**BlueGard**"as far as how to use for best results--etc..... Good Stuff. I'll be back with that asap.**

....and may our Awesome God Bless All Your Efforts..... And Bring You All some Decent Blueberry Prices that You can Actually Make some Money With.... r
