## Fruit Ridge Notes - Blues - Wednesday - June 28 - 2017

### Hey Blues Guys & Gals .... Hope Your Wednesday has been Going Well...

**Some Experts** are saying not to ask about any "Economic Threshold" for SWDs in your Blues.... If you see them...If you're catching them in Traps ...If they are anywhere on your Farm ...Just kill them very dead

very fast.

They are already very much around.... Strawberry Boys just finished in SW-MI....and around the Ridge.... and say they have never ever seen

SWDs so early in their season...Weeks ago.

Some **SW-Michigan Blues** have just started with Harvest.... SWDs abound.  
Those SW Michigan Blues Guys are sayin the Fruit Size could be better....  
Their KingBlooms mostly froze on these earliest Varieties..... Allegan and VanBuren Counties.

If you Guys have been reading the Fruit Ridge Notes I send....and the stuff MSU Rufus has published... You know which Chemistries are best for killing SWDs..... and also that you really have to mess things up bad to actually "run-out-of-Chemistry-choices" before you are all done killin SWDs .....

....Also...**Remember** that the EPA has just recently allowed for us to use the **Delegate** and Entrust both as "'One [1] Day-P.H.I.'" materials. This is kinda big....also in other "BushBerry" Crops.... the OMRI-Listed Entrust really huge for Organic Folks....  
Also a lot of Grandevo goin out the door for SWDs.... o-Days-PHI---**OMRI**-Listed....

**Fruit Ridge Notes** are archived at "**Reisters.Net**" ....

You can get **2 R.U.P. LicenseCredits** for attending the "**PreHarvest Blues Meeting**" tomorrow...Thursday--5p - 8p ....TrevorNichols--Fennville. Deanna says
