Fruit Ridge Notes - Friday - July 14 - 2017

Hey Everybody -- T.G.I.F.....

....There's a lot of "1-2-3" goin out the door....Meaning there's too

much F.Blight showing up in too many places.

....**Most Guys** involved in the fray seem to be doing a decent job on the **Secondary**Scab.... But we are getting too many Rains for them Boys.

If we can't get any Really-Dry-Warm-Weather to help us, we need to

just keep after it with the 5 Lb-Cap80WDG every 7-10 Days.

....**Q & A** ... Yup, We really like *several* **Calcium** Products....But it is the RidgeCAL-BPC-Phite-Plus you were referring to....with the SeaWeed and the Zinc... along with the 15%"Phite" and the Calcium....a very Excellent Calcium Tool....Very Cost-Effective when you seriously consider all the

Good-Stuff that is in this Formulation.

Ya'll are up-to-speed on the Hi-Test-Phite in this product and all the advantages that it brings ...and of course the SeaWeed.

There is absolutely no other Calcium product that gets into the Fruit any Faster than this one.

....**Cornell** did some serious work in the Hudson Valley using AzaGuard with OxiDate 2.0...on **SWDs**....Resulting in: "...reduction of SWD Eggs and Larvae by 100% and 77.78%..... And prior to OviPosition, a 90% Mortality rate of SWD." Kinda Cool....Especially for the Organic-

Production Folks.

.... "**Peace**...Is that brief glorious moment in History when everyone stands around reloading." ...*Thomas Jefferson*

....**Can you believe** it that in that *agr.news* I Fwd'd to You Guys, Jeff Alicandro was mentioning "'7-plus-Hail-Storms'" they have had in the Wayne County N.Y. Area...???!!!! OMGosh...Pitiful.

....**Q & A** -- Yes--The new **Grandevo WDG** comes in a **20 lb.Bag**.... Labeled on every Crop we deal with plus Okra and Pineapple It is Zero-o- Da.PHI..... 4 Hr.R.E.I. This stuff is getting some very good Press about SWD ControlBut most of Ya'll have been impressed with it for European Red Mite Control and also all Aphid controls in the last several years....with the "WP" formulation.

....**Sweet Fancy Moses**.... Where those Apples are light on the Tree, they're over 2+1/2 Inches already !!!!

....**Weekly Foliar Calcium** Applns on Honeys is really crucial.... Every 10-14 Days on every other Bitter-Pit-Susceptible Varieties.

Happy Weekend..... God is Great Beer is good.... r
