Hey Guys & Gals....

It's a Holiday Week End !!! 🙌🕶️

I know, right...??? You're Lucky if you can grab a chair long enuf to enjoy a Cold One 😞

******Thinning** is the Big-Main-Thing for the **Apple Guys** right now. One of my ol Fave Buddys use to say to use "1 Pint Black Velvet-per-Acre" when thinning. 😁

...It really is pretty nerve-wracking.

******Only** very few spots where they're seeing any Secondary Scab symptoms.... pretty ugly. Almost everyone did a great job... Saves a lot of \$\$\$\$ if you dont have to do the Secondary Crap. 🙌

******Smart Money** is keeping some AgriMycin[Strep] and some CS2005 handy for any **TraumaBlight** scenarios.....to help after the storm-attack. And keep in mind.... **Regalia** is a proven performer as a Protectant for F.Blight....as is **CS2005** ...and also the Phites.

MycoShield @1 lb - 1.5lb-Ac is also a great protectant if you know for sure that you're in for some Trauma...?? ...Otherwise you wasted your \$16 - \$24-per-Acre....as we cannot get any "Back-Action" out of the MycoShield.....

Foliar PhosPhites dont get enuf credit for their Fungicidal and Bactericidal and Nutritional attributes. There are 2 very clean efficient FoliarPhosPhites that we are proud to carry.... One with a "Nutritional" Label and also 1 with a EPA-Pesticide Label ...with the cost being about the same per gallon. Our **FormulaII-SW** Nutritional has the North-Atlantic SeaWeed in it..... while the "**KPhite7LP**" has the EPA-Fungicide-Bactericide Label on it. Both are the absolute-cleanest-most-efficient Phites you can find anywhere. That's why we can Tank-Mix either of these with 6-7-8 or more other products with the same Trip thru the Orchard if we want....Nutritions....Insecticides....Miticides....no problems.

And.... These are so extremely systemic that the F.Blight doesnt have a chance.

With the **1-2-3** the Regalia is moderately systemic, the CS2005 is really systemic, and the FormulaII-SW is 'off-the-charts' Systemic.....and all **OMRI** Listed

******The Blues** Guys and Gals are also very impressed wherever they use the **1-2-3.....** Controlling all of their Bacterial-Fungal-Pathogen-Targets... claiming nothing is coming thru it....
.....Same goes for the ...

******Grape** Guys the **1** Pint CS2005 ...with **2** Pint Regalia
.....with **3** Pint FormulaII-SW any-all Bacterial and Fungal
Issues....dont have a chance.

We surely hope and pray You All have a chance to Relax a bit this Weekend and **Thank our awesome God for our Veterans....** What a Courageous Group They Are !!!

Warm Regardsr
