Fruit Ridge Notes - Monday - June 26 - 2017

One Week ...from Tomorrow **Independence Day !!!**
I'm Just Planning ahead a Bit **One of Our Fave**
Holidays !!

******Looking Closer** at that ...to maybe help you with your planning or concerns.... We--RGSs-- will be open Saturday July 1st -- 9am til Noon.....and 8am til 2pm on Monday the 3rd.

I hear **Dr. J** will be here all day Monday.... til around 6pm. Then---He is off Tues-4th---and Wedns-5th...as he is normally off on Wednesdays. We RGSs will get back at it Wedn-July 5th.....

******A BigBatch** of Chatter over the last several days.... at least 5-6-7 Guys....With One very especially-agitated Grower that grows a bunch of Apples and Cherries... He tried 2 real big doses of **gramoxone sl 2.0** that he purchased 'down-the-street' He really over-dosed it trying to get a kill..... and the results were pitiful.... a lot of green crap still boldly standing there. He said "'It was laughing at him.'"Then he remembered.... "'Thats the crap that you need to use 2 or 3 times more than Reisters "'**ParaQuat 3SL**""...**And...** it costs nearly 2 times more per gallon than Reisters ParaQuat 3SL !!! "' Our Para**Quat3SL** can also be called "'Para**Zone** 3SL""same stuff.

His own calculations penciled out that in a younger block where he is actually treating 25% of the Orchard Floor, our ParaQuat 3SL cost him **\$6**-Treated-Acre.... While the gramoxone sl 2.0 cost him **over \$18** per-Treated-acre... Pretty disheartening with those green targets still standin there laughin at him.

Wherever You're using any of the Paraquats or gramoxones...It should be the 3Lb.A.I.-per-Gallon.... "'**3 SL**""...

It saves the 2nd and 3rd trip thru...saves a bunch of \$\$\$\$.... and infuriating laughter.

Most of My **Blues Pals** use this "'**3 SL**"" instead of the Glyphosates now.... Much less damage.

******We Still have** well over **2 months** of "'P.H.I.Days"' to use our **Abamectin 0.15EC** on most Varieties for EuropeanRedMite.... And on some of those you start harvesting earlier like August 20th - 25th....??? You still have a good month. It's a 28 Da.PHI....You should do 2 Full-Apps of Full-Rate-20 oz-Ac.Each.

Remember this is only like **\$18 Total for both Apps**. This stuff is only like **45 Cents-per-OZ... \$9-per-Appln. Don't** use the "Oil" they want you to. **Use** a really good 90-10-N.I.S....like **InSpray-90....**or Regulaid....or Activator-90.... Oil makes a mess and you have to be so darn careful with other Chemistries. InSpray-90 has performed very well...and helps all the other Tank-Mix-Partners work better also.

I highly UnRecommend any of the "Off-Brand" 90-10-N.I.S.s....Because of the Junk "Inerts" they often use....and our InSpray-90 costs less than any of those anyway.

Abamectin also gets SpiderMites, W.A.Leafhoppers and TentiformLeafMiners..... Only \$9-App-Full-Rate. You're allowed 40 OZs per-Season.

Remember this Cost-Effective-Product is also labeled on Apricots--Almost All Vegies and Herbs --Melons--Tomatoes--It's only 7 Da.PHI on Tomatoes--Squash--Tarts and Sweet Cherries--StoneFruits--Nectarines--PlumCots--Pears.... Many of those StoneFruits have only a 21 Day-PHI.... I just can't believe what a Bargain this stuff is.

******Check** out **Reisters.Net** when you get a sec Kinda Cool

******Again Lookn** Ahead.... 4 Weeks from this Friday....July 28... Our Annual **''Fruit RidgeFest''** a Whole Bunch of Fun--Food--Fellowship --- Always the 4th Friday in July

******And Again....** Jeff and Lindsay **Alicandros Annual Fruit Growers Orchard Research Tour** Wednesday - August 2nd ...Always the 1st Wednesday in August -- Wayne County N.Y.

Warmest Regardsr
