Fruit Ridge Notes - Monday - March 27 - 2017

Hello to All

They're Spraying a 3lb. rate Captan 80 WDG with 1 Qt. CS2005 in Deerfield this morning.... Lots of 'green' came on over the weekend.

Whenever a 'Big National Retailer' [BNR] Rep tells you about all the scenarios in which you need a high-A.I.-metallic-copper product, ask him to provide you the printed research substantiating his claim. There isn't any. I can't find *any*. *All renowned Researchers claim the opposite.and Nope.... There's still no other Copper Fungicide-Bactericide that works Systemically. Only CS2005.*

You do not need a pH reducer with CS2005. But remember about products like Captan that do need some help.

***** Switch Gears

Some recent discussions on Soil Analysis and pH and Testing frequency

- * A regular-common-place Soil Test should be done every 2-3 years... and can be stretched to 4 yrs under certain programs.
- * If you haven't done a Redox Soil Analysis, I highly recommend that you do asap. This one is extreme with 3 times the 'Data-Points'
- * A Soil pH of 6.2 - 6.6 is ideal for Apple-Pear-all Stone Fruits

If you are scratching your head wondering about any results from the traditional --
