Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Saturday - August 12 - 2017

**Hello from Fruit Ridge Avenue ..... If Any of You *Apple* and *Grape Guys* are Gonna Get a *Saturday Off* Before**

**Harvest...?? ...Ya Better Make It quick !!!** 🕶️🍷  
**Some more Q & A ...**

**\*\*\*\*Q & A...Grandevo on Grapes...???** Yes - 'Like' 👍 It's Labeled for 16 different Pests including Mites - Rollers - Hoppers - GrapeBerry Moth - WhiteFlies - Thrips .... I'd be at the 2.5 Lb. Rate---Be sure to Get Good Coverage--- Also ...Add 16 - 24 oz-Per-100-ga.-**InSpray-90** NIS. Grandevo is not the Cheapest thing in the Line-Up...But Grape Guys really like it. And it's a real God-Sent for the Organic Guys.... Deservedly a really really Big Widely-Used OMRI Product. And....Conventional Apple Guys are controlling Aphids and ERMites with **Grandevo** and with lower 20-30 oz rates !!!!! 👍 ....They are doing 3-4 Apps with great coverage and InSpray-90.

**\*\*\*\*Visiting with a Fave-Grower....**about 2-3 weeks back, He had just a few "Wollies" come thru his program ...which I thot was a Great-Low-Cost-Program with plenty of Imidacloprid-Etc.... A few Woolies in some RedDels... He went in with 1/2 rate Diazinon and got them Dead easily.... Only did 1 Alternate-Center.  
**\*\*\*\*Reminder: The Red Stuff ...the 'Indicate-5' ...the real-deal Claim-to-Fame** is that if you take 100 Gal. of clean fresh Spray Water, and add measured 'Indicate 5' to it, and it will tell you what your Water pH is by matching the Color of the Tank-Water to the Color-Key-Code-Gauge on the side of the Indicate Jug. So... If you do that just once and don't change your Water Supply, You're good to go for the Season ...because you can decipher how much 'Indicate 5' takes-per-100gal to get down to the pH you want.... **So Then**, With 1 Pint--100 Ga.Water you get a... \*\*pH Reducer and a \*\***Sequestering Agent** and a \*\*Middle-Weight Non-Ionic-Surfactant.... Altho not a whole lot [very little] of 'Sticker'. I think the under-rated **Big Deal is the Sequestering**...because now you do not need any Ammonium Sulfate anymore....Unless you really want the nitrogen that comes with AMS??

**And...** I believe **Indicate-5** is the component that really makes it possible for so many of our Guys to be getting so many various PGRs, Insecticides, Fungicides, Bactericides, Nutritionals, BioStimulants, Miticides.... **All** into the same Tank-Mix and **All** get-along so nice together.... with **No-Tank-Mix-Issues**. Some of those Mixes I have witnessed include 12-13-14 different Products.... with No Issues. Zero.

**\*\*\*\*Q & A....You are correct.** I guess I didn't notice that when I was writing it...?? But yes, those Fungicides I mentioned yesterday for Grapes..?? They were indeed all actually "Sterol-Inhibitors". There are several other good Choices....Like 4 oz-Ac-Quintec=\$14 I think is a good deal...14 Da.PHI--12 Hr.REI...Allowed 5 Apps....and it's a unique Chemistry.

We're on the Web!

See us at:

[www.reisters.net](http://www.reisters.net)

Use this especially where you have noticed "Strobie-Resistance".

For top-notch-Results, steer clear of any "Phites" except the Formula-II-SW or Formula I or the K-Phite 7LP. Most all other Phites carry to much baggage....and cause Tank-Mix issues like many of you have shared with me....kinda ugly unless you are using them almost alone in the Tank...??? But I can't imagine a scenario where that would happen preferably???

Our Fave Phites work excellent in the Tank-Mix with several other prudently selected Chemistries.

Did you remember that Aliette is a "Phite" ...??? ... \$50 - \$60 per Acre.... and barely Compatible with Itself.

Bottom Line on Phites....Look at the 10-15 different Products available, you find ours are almost always less-Cost-per-Gallon....and ours are the cleanest hardest workers.

\*\*\*\***Yesterday We Rec'd [2] Two** ... Short Sweet Rain Showers!!! ....During the Day.... Lovin it !!!

\*\*\*\***One Fave** just Checked out our **Reisters.Net** for the 1st Time ???!!!!!!?? Thank You for your encouraging words referencing the Christian Crosses on our Roofs!!! We have had only favorable Feed-Back about those.

Of this I am Certain....Our God Wins.

\*\*\*\***Q & A....**Yes ...It is the "**MainStay Calcium-S.I.**" Foliar Calcium that is brought to us by **Redox**.....It is *not* a "CalciumPhosPhite" ...But it is the Calcium getting the **most "Press"** ??? Some of our Fave Guys have had just crazy-great Bitter-Pit-Control-Success with this one we call "**S.I.**" with the 2015 and 2016 Harvests.... I mean really good... Like No Bitter-Pit----Zero.

They do 1 or 2 Apps of the "MainStay Calcium" on the Ground in the Weed-Control-Strip...and the MainStay"**S.I.**" as the Foliar....several times.

Also... Pls don't confuse the "S.I." with the Sterol-Inhibitor Fungicides NickName. No Connection.

\*\*\*\***Yes I do often** stress the importance of InSpray-90.... So... What's the big deal about specifically Inspray-90-NIS...??

Answer: It is 100% Top-Shelf-Clean-Pure-Quality 90-10-N.I.S..... Like Regulaid ...which I also truly really really like. But unless some of the guys 'down-the-street' have lowered their pricing on the Regulaid, it's way to much money. That really add\$ up at the end-of-\$season \$ummarizing.

\*\*\*\***Clarification: We do** have our original NeoPrene-Type ExtraFancy-Light-Wt ""Apple"Barrel"Pick-Buckets"" ....Lots of You really like those.

**And... We also carry** the Very Cool High-Quality-"Yield-Max" Pickn-Buckets which we bring in from Lindsay *Alicandro*-LaMora.... These have some very advanced Features....pretty Hi-Tec.... I think they come in from New Zealand. You have to see them to appreciate the Attributes.... And if you haven't seen them, Let us know if you'd like Matthew to bring one along with him to show you when he's Delivering your place.

These come in 1/2 Bu.Size, 3/4 Bu., and Full-Bu.Size. Impressive Buckets.

**Wishing Ya'll a Very Nice-Fun-Safe-Blessed Week End !!!!**

.....F
