Fruit Ridge Notes - Saturday - June 10 – 2017

Good Morning to All...

It's really gonna get Warm.... Especially for All of Us Ol Guys that are 28 Lbs-Over.... Linda says I am within 9 lbs of my Weight before my Aortic Dissection Episode.... So... I am almost back to my Same Fat-A __ Old Self!!! 😞

****Amy says** she needs 1 more nice rain to show that we are done with Primary.... She thinks that will do it. Stay tuned....Not over til It's Over....But....But....
But....History says that June 10 is the day we are normally on average done with Primary....
.....and my hats off to those of you that have no symptoms of Secondary showing up!!! Great Job!!! 👍👏😄🍻

****Those 10-Acre** Trial Blocks still look great. Early next week I plan on getting some photos of those Peaches--Plums--Grapes--Pears--Tart Cherries--Sweet Cherries--Nectarines--Apricots--Prunes--Fuji--Grannys--JonaGolds--Etc that are all Inter-Planted with the Red Dels and Goldens in the one Trial Block....that have had a very Steady-Diet-Two-Alt-Center-Per-Week-Applns of CS2005 Systemic Copper Bactericide-Fungicide since we started early April....photo's that I can send as attachments to the FruitRidgeNotes. The whole Block... Everything looks Awesome.

****Codling** Moth Control Apps are huge right now..... CM loves Hot Weather.

****These really hot** temps forecasted are a critical threat to any blocks with RagTagBloom...Especially those Beautiful-Brand-New-High-Dollar-Investment-Youngns CS2005 simply makes a ton of sense.

****BioProtecPlus** is a new BT Insecticide....Easy to use liquid Formulation... a New Specific Strain of BTK that covers a larger range of Pests and in more Crops.... Harmless to Beneficials.... Good UV Resistance I like it.
We are putting this up against Dipel anywhereso, the way I see it...we have a really

good chance that Dipel will come down in their cost to you Growers

!!! 😊 We always enjoy doin that!!!

****The best Rate-per-Acre Parka on Blues** is 2 Qts in 50 GWA. I have watched some of you when Spraying using 50 GWA---and you're doing a thorough job.

Do 1st-Appln at tiny Berry.....2nd Appln at Verasion.... Some Guys in Oregon do additional Applns even in between Picks for improved Fruit Integrity.

This is also a good rate to be using in Apples where your Trees are smaller....

****One of my Pals** in the SW Corner finished Asparagus 4 days ago.... He had a just incredible run with a "at-or-near \$60 Market" for several Weeks....just simply Awesome.

Congrats to him and his expert Market Strategists !!!! 🤝💰

****Washington** is currently shipping Grannys at \$30 !!! 👍

👏 ...and Red Dels at \$15 The higher the better !! 🤝💰

Lots of Graduation Parties ... Wow...Gotta Run....r
