## Fruit Ridge Notes - Saturday - June 24 - 2017

**Hey Guys ..... Hope Your Weekend is Starting Out Really Great ....**

**\*\*\*My good Friend Dr. Tim** Johnson just reminded me that where any of you might need some Controls on San Jose Scale Crawlers .... Grandevo and Venerate both have performed very well in Pennsylvania and New Jersey Field Trials, and of course they have been performing very well for Sucking Insects all over the planet.... I've always been impressed with Grandevo on European Red Mites and Green Apple Aphids. Both of these Products are a huge asset to the Organic Grower Group !!! But we have a bunch of Conventional Production Boys also using these.

Remember these are both **OMRI** Listed.... and Zero -0- Days P.H.I..... 4 Hr.R.E.I..... On virtually All Crops. And you will notice that Grandevo is also Labeled for All Aphids...All Mites....Whitefly, AppleMaggot Fly, All LeafRollers, Jap Beetle, SWDs, CodlingMoth, Oriental Fruit Moth [all Moths] .... Mealybug...Pear Psylla..... **And**...Neither of these Products will harm **Beneficials** / Predators.

And.... I don't see any Limitations as to Total-Lbs-per-Season-Use on the Label..... or the Max-Number of applications.

For both of these Friendly-Chemistries, You can also use Chemigation and Airplanes for Application.... And...**There's at least 140 different Crops** on that Grandevo Label !!!! ....Like everything we grow around here.

These are the same Cats that make *Regalia*...Another of my Faves.

**\*\*\*For Any of You Guys**.... That like the *Quilt-Xcel* .... Please take a good look at Big Savings with "**AzoxyPropXtra**" ...same identical stuff as the Quilt-Xcel.... Same Label...Same Crops. This is a ComboProduct of the Azoxy-Strobil and Propiconazole.... I consider it a very Top-Choice-Efficiency Fungicide-Bactericide Product.

On Tarts--Zero -0- Da.P.H.I....12 Hr.REI....70 oz-Ac-Seasonal Limit... Use 14 oz-ac...So you could use it 5 times if you want... Airplanes allowed....

On Peaches-- Zero -0- Da.PHI... 12 Hr REI... 70 oz-Seasonal Limit.... 14 oz-Ac. Rate---You can do 5 Applns..... Air and Ground

We're on the Web!

See us at:

[www.reisters.net](http://www.reisters.net)

On Blues -- **30** Da.PHI.... 12 Hr REI....82 oz-Ac.-Seasonal Limit--3  
Applns Max-Season...@ 14-21 oz-Ac....Airplanes allowed.....

**30** Da.PHI on Grapes.

.....Labeled on Cots...All the Vegies... All

Cherries...Cranberries...Nectarines....Plums....PlumCots....Prunes....

Raspberries.....all the Nut Crops and Grain Crops....All the different

Beans... Like the Dry Beans of all kinds..... And that 14 oz-Ac-Rate is  
only like **\$15** - \$16 per Acre.

This is the same Strobie as in "Abound".....Be really really careful  
around Apple Trees..... Makes Phyto for some crazy reason.

\*\*\***As** the **Tarts & Sweets** mature, the Brown Rot risk gets scary.

I'd be taking that *Indar-12oz-Captan80-2.5Lbs-Combo* very

seriously.... Also probably 1 or 2 AzoxyPropXtra Applns....

All the above = 0 Da.PHI.

Remember that the "Pyraclostrobin" Strobie in Pristine, is a slightly  
different Molecular-Tweek than the Azoxystrobin.

I just don't like Pristine, because even after they know they have  
Resistance to their Boscalid component, they still charge All-The-  
Money-Per-Acre...????!!!!???? ....Like \$40 ????? ....Ticks me off.

Hope You Have a Fun & Safe Weekend....r
