Fruit Ridge Notes - Saturday - September 2 - 2017

**Hi Everybody..... It's Saturday Morning of the Labor-Day-Holiday-Week-End ....**  
**.....Hoping that Your Weekend is Off to a Great Start !!!**

**\*\*\*Hey Apple Guys -- Please Remember ....** A Real-Apple-Sizing-Tool.... You hopefully first heard about this last Feb-Meetings.... and I have mentioned it earlier in my FRNotes...

.....For where You have any Varieties that are gonna really struggle to make **Sizing** that offers profitability... Please consider the relatively new Agrinos Product "**B-Sure**" .....

....that contains Ultra-Plant-Available L-AminoAcids, Proteins[both True & Crude], Carbon and Essential Metabolic Micro's....

This stuff is derived from a very unique Proprietary Fermentation Process producing many Components all of which are essential to Plant Photosynthesis & Metabolism.

**"B-Sure"** will readily move into the Plant thru the Cuticular Pores and Stomatal openings .... Helping the Tree to Increase the Fruit Size thru it's Natural Process.

Research Documentation also shows that the B-Sure Treated Trees are much Happier in the Spring of the following Year.

I recommend you be using **1 Qt-Ac. Foliar** on Full-Production-Size Trees....Good Coverage... No need to go over 3 Pints on huge Trees.....Just try to get real good coverage.

On your Younger Blocks just do **16 - 20 oz.....**

The **1-Qt-Rate-Cost = \$12** ....Very Cost-Effective... 16 oz Rate = **\$6**. You might wonder if this is *just a DoubleDuty on VitaZyme...??* Actually No...Totally different Product...No Relation... But both work very hard to get you more Profitable....And they work cheap.

Some of Ya'll remember from the Meetings last February.... The Agrinos Folks are the Guys that start with a Raw-Product of Shrimp-Brains.... Shrimp-Heads and Tails... a Bi-Product from Food-Processing Plants around the Gulf-Mexico.

There are presently a bunch of very impressed Agrinos-Products Users.... and this Stuff is OMRI-Listed.... a Natural Fermented Product. This is fun stuff and it is most certainly not like the ol fish emulsion....that old really stinky crap....??? My "User-Pals" say it doesn't smell bad at all.

If you have some new Young Blocks wherein the Irrigation is not yet Up & Runnin, consider 1 pint of B-Sure as a Foliar....This stuff is huge good for Drought-Stress.
