Fruit Ridge Notes- Stone Fruit – Thursday - October 26 - 2017

Hey Faves

I forgot to mention to Ya'll Yesterday.... Only 2 Months til CHRISTmas.....

Ya Know.... I mentioned how the CS2005 used in the 10-Ac-Trial-Apple-Blocks was also being applied to some InterPlanted Tarts and Sweets and Cots and Peaches and Nectarines and Plums and Grapes and Pears ...Like several Varieties of Each of all those different Fruits....?? Like 16 Full-Apps....??

And Ya know how I said I really appreciate Your Feed-Back - Comments - Questions about F.R.Notes.... ???

.....So..... I received some Photos from a Cherry Grower Pal up around the Leelanau Peninsular He has been using a bunch of "'005'" on his Tarts....

And still has all his Foliage and really Lookn Green-Great And he says his 2 Shots of his Fave Redox Nutrients of course helped a lot. See attached **Photo....**

Some Guys are really strugglin with kinda ugly Defoliation...especially in the Tops of the Trees..... and Some Experts claim that the issue is worse in the Tops due to poor Coverage. That makes sense to me....Especially when the Wind is Howling against Ya....

So.... They want us to target the Top 1/3 of the Tree with 2/3s of the Disease-Control-Pesticides. Some Guys are adjusting their Nozzling.

If You are Reading this, it's because You're on my "'Stone-Fruit'" Grower-Group-EMail-List.... If I am mistaken in having you in this Group-list, Please reply with which Crops you do Grow, and Alicia will make the correction.... Thanks so Much

Have a Great Thursday..... r
