Fruit Ridge Notes - Stone Fruits & Grapes - Friday - May 5 - 2017

Greetings Faves

The Forecast stays aggravating and scary..... It's doggone chilly out there.

****Thinking about **Glacier** Apply 24 - 48 Hours before anticipated Freeze. I would not Tank-Mix other Pesticides with this....mainly because the Label says not to.

The Label says not to apply during Full Bloom the reason is that they had someone complain about some discoloration of some of the Bloom-Flower-Petals. This did not cause any Crop-Reduction....But the Manufacturers always need to play it safe. It's the "CMA" thing. Dont use any surfactants with Glacier.

Stone Fruits - Full Size production Trees Use 4 Qts - Acre

Grapes - Use 2-4 Qts - Acre

****When you Guys & Gals are deciding which Pesticides to add to the Tank-Mix, I am hoping you seriously look at what you are being charged for stuff like

--Rally 40W

--Elite45WSP

--Tilt Our generic products that are the same as these can save you serious money.

And whenever you see "Bordeaux Mixture" which is a serious mess....you can be using 1-2 pints CS2005 instead, for around \$10-Ac [1.5Pt].....

....and there's a dozen Foliar PhosPhites listed on Pg.42--E-154 MSU Guide, none of which have the great Compatibility-Characteristics and efficacy of our Formula-II-SW, and of course ours has the SeaWeed in it.

We also have a Phite called Formula I ...without the SeaWeed.

And....Nearly all of our Growers tell us that Regalia always out-performs the other Biologicals.... replacing pricey Bio's like Sonata and SerenadeMax.

Also---Look at what you are paying for Lannate/Nudrin90SP Baythroid Warrior Permethrin MustangMaxx. Some of these Nukes can be as little as \$2 - \$3 - \$4 - \$5 per acre.

I'm seriously hoping we can help you get more of the right stuff into your Tank for a lot less \$\$\$ than it is costing you down-the-street.

Warmest Regards ...r
