Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Thursday - July 13 - 2017

### *Hello to All...*

.....**Received** a couple calls referencing **F.Blight** in **2 Yr-Old-Apples**..... Recommended to Keep them covered with the **"1-2-3"** .....Very Efficient and LowCost.... Calculating your TRV it's like \$9 - \$10 per- acre ??? That **"1-2-3"** Combo is crammed full of Bactericides-Fungicides....Good Stuff.

I see Alicandro tells his Guys to use only just "005" from MagnaBon or another "Low-A.I.Copper-Fungicide-Bactericide" ...Remember, the "005" is the only one that is Systemic.

Also ....Remember the Systemic qualities of the **"2"**=Regalia and the

**"3"** Formula II-SW [Phite]

.....**There are some Organic** Blues Boys very pleased with the new **"BioCeres WP"** BioInsecticide ....Using for SWDs..... It's a new strain of BeauveriaBassiana. The stuff is really working. On Cherries too.... if you're doin Organic Cherries....??

o Da.P.H.I.---7 Days Residual Activity ....4 Hour-R.E.I....Use 1 - 2 Lb-Ac. OMRI Listed

.....**SWDs** are just crazy horrible this Season....MSU Rufus and Julianna Wilson saying yesterday.... the SWD Pressure is Early and High....and to Spray thoroughly and often....

They are asking all to do Full Rates and Full Covers.

.....**Having some High-Pressure BrownRot** Weather-Conditions--Cherries--

\*\*Captan+Indar-"E"-o Da.PHI \*\*LunaSensation-"G/E"-1 Da.PHI  
\*\*Merivon-"G/E"-o Da.PHI \*\*Tebucon/Elite-"G"-o Da.PHI \*\*Tilt-"G"-o Da.PHI

**Good Grief** .... This has been just about all Crappy Bad News....  
Sorry ....r
