Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Thursday - May 11 - 2017

### Greetings All .....

\*\*\*\*\* Yes !! **Kudos 27.5WDG** can be added right into your AppleScab and/or Fireblight-Antibiotic TankMixes thru Petal Fall and thereafter. Kudos likes 'Indicate 5' as a Water Conditioner, to be added to the Tank-Mix before adding the Kudos. Kudos also likes a 90-10-N.I.S. in the Tank. To consider both job-descriptions, see RidgeRunner below.

In a few days the FireBlight issue will possibly need some attention...?? ...based on the ForeCast...?? ...with the screwed-up-rag-tag Bloom we're likely going to be seeing...??

\*\*\*\*\* N.I.S.90-10's ... are about as good as Surfactants get. A straight 90-10 is a great Spreader-Activator....improving absorption and increasing efficacy of Pesticides. The 90-10s *are not* a Silicone type surfactant. We have found a very favorable degree of Spray Deposition and Penetration and Coverage with the 90-10s.

Most BNRs have their own 90-10s and I won't pretend to know all the names....but the most talked about and popular and the most famous names would be **\*\*Regulaid** and **\*\*Activator-90** and **\*InSpray-90**. We consider these all to be great and equal performers.... and we like **InSpray-90** the most why ?? ... because we can save you serious money on that one. And InSpray-90 is formulated by one of the most trusted World-Renowned-Manufacturers that we work with.

That same Manufr makes **Indicate 5** which replaces the Ammo.Sulfate "Sequestering" job-description called for by many Pesticides and PGRs..... and Indicate 5 also lowers the pH of your Tank-Solution. And if you want to do it *all-in-one*....the \*Sequestering...the \*pH-Downer... the \*SprdrStckrActivatorPenetrater... You can use **Ridge Runner...**

that is made up of **1/2 Indicate 5** and **1/2 InSpray-90**.

\*\*\*\*\* I was just looking on the **Agrian WebSite** .... which I hope most of you are familiar with now....??

It is the best Agri-Product Website I have found..... [www.agrian.com/labelcenter/results](http://www.agrian.com/labelcenter/results)

Anyway, I was looking at "**005**" from **MagnaBon**---the "**CS2005**" with the on-and-on-and on-going List of Crops it is Registered on ....

...All the different Berries ....all Tree Fruits and Nut Crops....Including Tropicals .... All the Vegetables you can think of..... All Field & Forage Crops including Legumes .... Grain Crops.... It looks like maybe 75 or more Crops total....???

.....And then also looking at the long list of Bacterial & Fungal Diseases it is Labeled for on all these different Crops ....

....All of the Various \*Leaf Spots----I mean all the different kinds of "Specks" and "Spots"and \*Cankers - \*Blight - \*Pseudomonas - \*Erwinias - \*All the Mildews - \*Blotches - \*Cane Spots - \*several Different Rusts - \*Anthracnose - \*Brown Rot--All Rots - \*Scab - \*Melanose - \*Pink Pitting - \*Greasy Spot - \*Phomopsis - \*ShotHole .....

....This List goes on and on but I'm runnin out of time..... but just think of all the different "Leaf Spots" ...like Alternaria and Angular and CherryLeaf....?? .....plus at least 5 - 10 more 'Spots' ....

.... and All the different kinds of "Rots" effecting Fruits and Limbs and Tree Trunks .... And all the various Blights infecting Stems and Blossoms and New Growth.

And then consider that "**005**" is the only Copper Bactericide-Fungicide product available on the Market today that is recognized by the Researchers as "Systemic" ...???

....Wow....No wonder Smart Money gets the results he does.... and he does it so low-cost-cheap !!!

\*\*\*\*\* Hope to see All of you *Blues Pals* at the M.S.U.**Blueberry-Bloom-Meeting** at the Fillmore St. Complex ....5p - 7p  
.... I think the address is - 12220 Fillmore St - West Olive - 49460  
We're bringing the Pizza and Refreshments....

Warmest Regards .....r
