Fruit Ridge Notes - Tree Fruit - Monday - March 27 - 2017

Hey Guys & Gals We Hope Your WeekEnd was pretty DogGone Nice....

....As we Approach that Season when Weekends can get unfortunately Screwed-Up with Weather Demands & Spraying.

Sweet Fancy Moses !!! Two full pages from Researcher Jeff Alicandro about the critical importance of **Microbial Soil Inoculants** in your Orchard !!!???!?

These are a big deal in our commercially cultivated often *microbe depleted soils*.... Big Deal as they seriously **improve utilization of Nutrients & Water**. Jeff says these *benefits have been clearly established* in scenarios across the board....Soil Amendments all the way to Seed Treatments and ...

.... that these are not GMOs [genetically-modified-organisms].

So far, the EPA / USDA are not involved, and there are no known export restrictions.

Is **VitaZyme** one of these Microbials ???

Jeff says.... "**VitaZyme has been both Lab and Field Proven to encourage the proliferation of beneficial Soil Microbes.**"

And **VitaZyme** is so **Cost-Effective-Cheap** to use like for a **20 Acre Block** - **\$64** - **That's correct**-- a little over **\$3 per acre** when you apply a recommended 1 pint-acre in weed control strip along with your Herbicides and other Nutritionalsanything else you want in the Tank. But while it energizes microbial activity, VitaZyme does not directly provide 'mycorrhizal fungi' inputs.

.... And remember that VitaZyme enhances the Herbicide performance by invigorating Weeds & Grasses to suck in the herbicide-chemistries.

Dont forget to treat the roots of new Trees with VitaZyme before you plant !!!

...and VitaZyme is labeld **OMRI** Approved for all of your Organic Production.

We can expect Soil Microbial Health measurements to soon be available like Soil Tests...as this critical concept begins to get more deserved acclaim. Some select Soil Labs can do this now.

Soil Microbial products vary in the number of microbial species offered, and also in the rates of each species provided in their offering.

Our Thanks to Alicandro -- Staying In Front of It
