## Fruit Ridge Notes - Tree Fruit - Wednesday - April 12 - 2017

Hello to All from Fruit Ridge Ave ....

It's a beautiful Wednesday so far ... Should be Sunny and near

60°F here in a bit.

It sounds like almost everyone has the same "wollerin-thru-

the-mud" issues ...?? What a mess.

It won't be long and you're going to want to be adding your \***ZincRush-9** and the \***Boron Xtra** to the Mix.... at Pink and Petal Fall.

Where you have no serious deficiencies, a Pink and Petal Fall will normally suffice. Use 3-4 Pt.-ac. ZincRush-9 along with 10-12 oz.-Ac. Boron Xtra in both Applns.

These have historically out-performed competitive products in all Side-X-Side Trials due to the High-Performance "Delivery-Package" that is in the Formulation.

My Thanks to Patrick *...the MSU Kid...* that owns Custom Ag Formulators in Fresno California, that commands the expertise required to build these products making them so efficient in the Plants--the Trees--all Targets. Nobody else has that Delivery System .... and it is a top-secret well-guarded Proprietary "Inert-Package" ....

Most of you might remember from the PowerPointPresentations at the Winter Meetings, where in our Trial Blocks, our BoronXtra and ZincRush were **in every Tank...All Season....**at various rates....along with all the Solu-Bags and all PGRs and other Nutritions and Pesticides....just to prove that we could without having any Tank-Mix-Issues ....No Issues....None ....Ever.

If any of you want to/need to prove it to yourself, you would likely want to use the 'Before and After Tissue Analysis' methodology as we did. It is a little bit pricey, but pretty fun. You can spend a whole lot more on other Borons and Zincs ... but you'll always get less into the Plant Tissue Target, based on our Side-X-Side Trials over the years.

Remember if you're using the old-fashioned sludge coppers, try to done with those by 1/4"Green on all FreshFruit Varieties.

I just had a sizable 'Smart Money' Grower at my desk... He said ... "You can't russet any fruit with CS2005." He's has convinced himself ...by "walking-before-running". He uses "005" for Scab - Mildew - FireBlight - Limb-Rots - All of the above. He uses "005" during Bloom sometimes...no problem.

Alicandro says "Walk Before You Run."

Yup---The Winner of the CS2005 - 2 x 2.5gal. case ...for the correct Best-Guess-1st-Apple Scab Infection - Sparta Station 2017 is Dale Momber.

Enjoy Your Wednesday !!
