Fruit Ridge Notes - Tuesday - July 11 - 2017

Very Warm Greetings from Very Warm Fruit Ridge Avenue....

******Please Remember** to note your **Calendar** about Friday - July 28 - 2 Weeks from this coming Friday - for the "**Fruit Ridge Fest**" ...a time for Fellowship ...Great Food & Beverages with Michigan Wines and Beers ...Fun ...Relaxation. 3p - 8p.

If you have a **Classic** Tractor or Classic Car you wouldn't mind sharing, please plan to come on over a bit early and park it here to "Show-It-Off" !!!

We look forward to this Event as another Opportunity for us to show our **Appreciation** to All of You... our **Valued Friends and Customers** !!! Friday--28th---Just Look for the Great Big Tent and a Bunch of Folks Enjoying their Friends and Neighbors !!!

******Just Talked with a Blues Guy** that has not yet had **Alias 4F [Imidacloprid]** in his Tank at all this year. I scolded him.

But at least now he can legally have it in his Tank for SWDs and all the Hoppers and Japs and many other Insect Targets, @ **3.2 oz-Ac.** for 5 Apps.

And Yes... I am saying for SWDs...as Imidacloprid [**Provado**] is the original Neonicotinoid.... and as you know there's a couple of todays new Neonic's rated "Good" for SWDs.....??? Just Sayin....when Alias 4F is costing me **\$1.95-per-Ac-at-Full-Rate**...??? Why would I not be having that in my Tank-Mix to the maxed-out-fullest-Legal-Limit????!!!!???? ...Which is 5 apps = total of 16 oz-Season.

It's a 12 Hr.R.E.I. and 3 Da.P.H.I. on Blues....and is **Not** a R.U.P.

Remember, in your records, to Identify your 'Target' as the JapBeetle... so you can do the 3.2 oz. rate. Some Pest-Targets only call for 1.6 oz.Rate on the Label. Don't skimp.... Don't cut-corners... Do 3.2 oz.... for **less than \$2-Ac**.... The Label asks us to keep on 7-Day-Intervals...No closer. Apply by Ground [20 GWA min. suggested] or by Air [5 GWA.Min]

Aphids--Sharpshooters--LeafHoppers are Labeled for a 1.6 oz-Ac.Use Rate... So in your RecordBook, name your Target as JapBeetle or Blueberry Maggot or Thrips... @ 3.2 oz.Ac.

Some other Cuzzns --**Neonic's**.....are: AdmirePro--Venom--Belay--Couraze--Leverage--Calypso--Platinum--Actara--Assail.... and most of you know how expensive a couple of these are...??

See us at:

www.reisters.net

You can Tank-Mix other Insecticides with our Alias 4F if you want.... I recommend it.... like Hero [cheap] or MustangMaxx [cheap]..... or Imidan or Lannate.

Don't under-estimate how costly SWDs can be...

Keep Alias 4F in your Tank once-a-week where you can on Blues within the 3 Da.PHI.

On **Apples** we have a 7 Da.PHI with a 12 Hr.REI.....Allowed 5 Applns @ 3.2 oz.-Ac.

Alias 4F is very Safe for Beneficials-Predators.....but Very Bad for Bee's.

******Yup---Lannate** indeed has some awesome "Generics" ...Huge Savings.... More than you think.

On **Blues**--3 Da.PHI..... 48 Hr.REI.... Use-Rate = 1 Lb.Ac.... You're allowed 4 Applns... by Ground or by Air.

On **Apples**..... 14 Da.PHI..... 72 Hr.REI ... Allowed 5 Applns @ 1 Lb.Ac.

******Also Save** \$some \$erious money with our "**BT**" called BioProtec.... Great Worm-Killer.

******We have some Grandevo** WP left in Stock at a discounted price....And we also have the new **Grandevo WDG**. As just about All of You **Blues Boys** have heard, Grandevo is getting some very good M.S.U.press for use in the SWDs War.

And the **Apple** Guys know how well Grandevo keeps the E.R.M.s and Green Aphids out.

******It Appears** most everyone in the Secondary Fight has been doing a very good job with keeping the ScabCrap off the Fruit. **Congrats** on that...It ain't easy. Some [most] are doing this with straight Cap80WDG at 5lbs.

******Alicandros** Summer Research Tour = Wednesday = Aug. 2nd..... Good Stuff

Keep the FaithWarm Regards....r
