# Fruit Ridge Notes

Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Wednesday - August 23 - 2017

### Warmest Greetings to All Our Pals ....

*Looking at Some Fruit in the Bins....  
Wow - That Freeze-Damage is just Doggone Ugly....But there's a bunch  
of Beautiful Apples in there as well..... What a Challenge for the Fresh-  
Pack-Lines ....*

\*\*\*\***Q & A....Yes--I Love Lannate. But--**It's \$28...and It's a 72

Hr.REI.

Yes - Lannate is rated "**E**" ....But it's **28** Bucks.  
Using Full-Rates of my Warrior[Gn] and ProVoke [Imidacloprid] is also  
rated "**E**"....and it's \$4 total. And I doubt it takes out anymore Friendly-  
Beneficials than Lannate??

But Hey....I still have Lots of Lannate here for Ya !!

\*\*\*\***Some very encouraging Reports ....** from Guys using the "**1-2-3**"  
on the Summer Diseases.... Disease-Free-Trees and Bushes and

VegiePlants are really lookn great.

**1-2-3 = 1 Pt CS2005 + 2 Pt Regalia + 3 Pt FormulaII-SW.**

....And the recent showers are helping all Plants & Animals & All of  
Us be Happier.....

\*\*\*\***Yup---You can do** the **Abamectin 0.15EC on Pears** just like on  
Apples....28 Da.PHI. Use 20 oz-Ac. Use the InSpray-90 at 3 Pint-100gal.  
Do Not mess with any Oils.

Have you done a Abamectin Appln earlier...?? Remember  
you're legally allowed 2 Apps of 20 oz Each....40 oz/Ac.-Season....and  
Remember this is a R.U.P.

....and Watch your Calendar.... 28 Da.PHI. And also.... I see what you

mean.... that it isn't listed on Pg.122 MSU-E-154, but it is on Pg.121  
and has all the other Notations as needed.... So, We're Good.... But 28

Da.PHI

\*\*\*\***No----Prevam is not OMRI--Organic Labeled....**But ...The Brother & Sister Products **ORO-Boost and the ORO-RZ** are definitely being used by the **Organic Production** Crowd.... Lots of gratifying Feed-Back.... Stuff Works !!

\*\*\*\***100% Coverage is Critical** for Internal-Worm-Control in Apples..... Maybe even a bit better than 100% if you can. No matter which Pesticide you use..... Strive for 100 - 130% Coverage.

\*\*\*\***Some Tart Cherry Trees are in pretty Ugly-Bad-Shape....**Very Stressed from the loss of Foliage due to Disease, and also the Butt-Kickn they took from the Harvest... And there's a few areas are still Drought-Stressed. So....??? What to Do....

Another Nutritional-App makes really good sense. **\*\*Get 100% Coverage.... \*\*Use 1 Pint-Ac-VitaZyme [Less than \$8] .... \*\*and 3 Qt.-Ac.Formula II-SW..... \*\*Also have 2 lbs.-Ac. DiKaP in the Mix. **Be** sure to *Leave a couple Part-Rows UnTreated....* Just so you can see what I mean..... **Or.....** If you just simply cannot suffer the additional Expense, just Only *Do 1 Tank with this Recipe.* So You can still see what I mean .....**

\*\*\*\***Remember When You're doing the Final-Draft** ...of your **Spray Records...**for the Auditor ...and-or for your Fresh-Packer and your Processor Folks.... **Keep your MSU-E-154 very handy** and make sure everything you are writing down complies with the E-154. Take the extra time to be sure there are no Red-Flags anywhere.....??

\*\*\*\***As the Season gets Everyone** consumed with Harvest-Efforts, and the Sprayin slows way down, and Ya'll have less time to read Fruit Ridge Notes, I'll be doin fewer of these. I'm still going to be sending *some*, just not as frequently. I'm hopin You Miss them ...

*Warmest Regards ....r*
