Fruit Ridge Notes - Wednesday - July 19 - 2017

Warm Greetings to All Ya's It's a Warm Week

And We'll Take What We Get

******Blush** Time Blush is the 1st PGR specifically developed to bring out the **Red** color in Fuji, Gala, HoneyCrisp, Macs, PaulaReds, Pink Lady ...and several other Bi-Colored Varieties. It actually does work.... Over 90% of those Growers that have seriously watched Blush PGR performance for many years claim the only time it doesn't show a marked improvement is when Mother Nature does such a beautiful job with Cold Nights & Sunny Days that everything colors

up really nice. Only then is it hard to find the improvement.

******Apple-Sales Desk-Guys** Asking that You Be on Your Toes for Sun-Burn--Sun-Scald.....Buyers hate that...

Check with us about a very sweet deal to protect your Fruit-Finish from those Issues of Ugliness.....Get some real-deal-

savings...

******Your '''Post-Appn''' on Cherries**.... For you Guys in the SW-Corner that finished Harvest already.... Zinc & Boron ...and VitaZyme Use 2 Qts. ZincRush-9 along with 10-12 oz Boron Xtra and 1 Pint-Ac.VitaZyme You just can't do that Post-App any better than that Combo does it.... Remember the Stress-Reliever..... That VitaZyme really helps after the Shaker Harvester has stressed

those Trees.

******SWD-Trap-Catches** are *up sharply* in the MI.-SouthEast,

SouthWest, Ridge and WestCentral areas... 🙄 The MSU Reporter says... 'Commercial Farms using an effective spray program for this Pest generally have it under control.'

******Q & A** ... **Yes**--Regalia is truthfully actually made from Giant-Knot-Weed !! ...Sorry...I don't know all the 'why-how'.... I just know it really works.... There have been several other Biological Fungicides in earlier years, but this Regalia is '*...like on Steroids compared to the old ones*' I had a Researcher tell me that.... and of course there have been hundreds of Growers proving it for themselves. **And no**...There are **No KnotWeed break-outs** where they use it. 😊

******Pretty Please**For the Party here on the 28th... If you have any **Classics.... Cars and/or Tractors**.... Bring them over before the Festivities start and Park them in our '' Designated

Cool-Car & Tractor Areas'' 🚗🚲🚗

******If we get a Trauma-Event** type Storm now, Keep in mind on your **Production-Blocks**...the Da.PHI on Strep = 50 Da....Not to worry about PHI on Non-Bearing Blocks.... And I'd surely be having CS2005 in the Tank-Mix.

******Some Guys Asking**... about **BMStinkBug**.... I'm thinkin Generic Warrior==LambdaCy1EC=== On **Apples**===21 Da.P.H.I.==Full-Recommended Rate=**5.12 oz-Ac.**== **\$2.00/Acre.**

Pretty amazing....\$2. I know on some **Row-Crops** this has a lower-use-rate-per-are....and those Guys are spraying it for **\$1-Acre**... 😄 Makes me smile. 😊

I am told the Pyrethroids are strong against that BMSB.... Mustang Maxx=14 Da.PHI=Full-Rate=4 oz-less than \$4.... Asana=21 Da.PHI=Full-Rate-14.5 oz.-Ac=\$6.67
....On Peach-Prune-Plum-Cots - Asana PHI is 14 Da.

Best Regardsr
