Fruit Ridge Notes - Wednesday - July 5 - 2017

Greetings Friends

What a Beautiful Day We had Here for the 4th of July.... Just Perfect Weather !!!

******Blues Pals**....Please Watch your Da.P.H.I. on Propicon3.6EC... That's a 30-Da.PHI.....12 Hr.REI... But--Smart Money will still have it in the Tank on anything we're not harvesting for 30 Days Yet....Maybe your Elliotts...?? Hugely Cost-Effective-Hard-Workn-Chemistry.

And Remember **Azoxy 2SC**....same as Abound.... Zero [-o-] Da.P.H.I..... 4 Hr.REI....Very Low-Cost Generic-High-Efficiency Fungicide.

If you're one of those BluesBoys that hasn't gotten into the "Xtra-Special-Efforts" with some of our Fave Nutritional....Pls take a look at the "**Sizer XL**"... Maybe just on 1 Tank.... or on 1/2 of a Production Block.... Use 3-4-5 Qts-Acre...5 Qts. on really big-full-production Bushes. It costs \$16.88-Gallon.... a serious Bargain. It's a 4-20-22 with some other very-Hi-Tech-Proprietary Goodies in it.

******Our Redox** Discipleship is Growing by Leaps & Bounds. This stuff is amazing....whatever it touches. My **Hats-Off** to All you Guys Using and Seriously Watching the results.

The Fruit Size & Quality of one Sweet Cherry Guy near here is just astounding..... All the right moves at the right times..... and now, All the

Money

******Most of you Guys** are aware of this....**Imidan70W** is adversely effected by higher Water pH.... Try to keep your Tank-pH down around 6 - 6.5 or a little less. Just about all of you use this good-ol Work-Horse....It's Labeled for almost everything we work with.... Except you

Sweet Cherry Guys....Not Labeled... Sorry.

******For Return-Bloom** Strategies on **Apples**....Remember that Motivate [Ethephon] can be Tank-Mixed wVitaZyme & Refine 3.5WSG [NAA] & your Foliar Calcium Applns.

We're on the Web!

See us at:

www.reisters.net

I see where *Alicandro* makes a '*Special Mention*' that we should definitely have *VitaZyme* in this Tank to help enhance *ReturnBloom*.

And....Remember to have your Motivate Applns all done 6 Weeks prior to anticipated Harvest.

******Please look to make sure** you're On-Track to get your full-16-oz.Seasonal-Legal-Limit of Imidacloprid 4F on--Same As: Alias4F, Montana4F, Macho4F, Nuprid4F... Also called a dozen other Names. But... Don't get confused with some that are not the **4F**... There's still a bunch of the old**1.6F** stuff around the Market with a 8-oz-Ac.Use-Rate. And it always ends up costing Growers a bunch more-per-Acre by the end of the Season..... like twice as much.

Use the correct product at Full-Rate for **\$1.97**-per-Acre.... **5 Apps of 3.2 oz-Ac.** And remember this stuff gets **Hoppers** and **Aphids** and **Jap Beetle** and **TentiformLeafMiner** and many others..... a Buck-97.

******The Vegetable** Guys are taking the new "**SAver**" seriously.... It's the 2-0-10 with the very-impressive-Proprietaries-Inerts in it...

like SalicylateAcidVery Impressive.....Huge.

******If any of Ya'll** have a High-Boy-Style-Rogator type Machine that could take time to help out a Poor Christian Boy on the east side of Kent City, by Spraying 2 or 3 small parcels, pls let me know. He

said he would make it worth your while.

Thanks Much r
