Fruit Ridge Notes - Wednesday - June 14 - 2017

Greetings to All..... We had .001 Inch-Rain here this AM....
The Sun was shining thru it all during the brief Shower.
My Dad used to say...."Better than a Hot-Dry Wind."

Amy is still waiting for a Shower to prove Primary is over. But I can't say that I disagree with several of Ya'll that have already declared it over...??? It's just been too dry too long for those miserable ScabSpores to survive....at least that's what I'm tellin myself.

Smart Money has been laying low when it stays so confounded hot....not sprayin anything. Too hot.

Lookn at SWDs...

****Grandevo is now rated 'Good'--0 DaPHI... On all Crops**

****PermUp[Permethrins] rated Excellent--3 DaPHI-Cherry**

****Imidan rated Excellent--7 DaPHI on Cherry but only 3**

DaPHI on Blues

****MustangMaxx--Excellent--1 DaPHI--Blues--14 DaPHI--**

Cherries--1 DaPHI on Grapes

****Warrior/LambdaCy--Excellent--14 DaPHI--Cherry & Apple**

****Baythroid--Rated Good--7 DaPHI on Cherry--Apple--**

PlumsPeachPrune--Pears....3 DaPHI on Grapes

**and....These's a bunch more that are Huge Money--
PerAcreCost--Huge....But are Rated Excellent.**

This Hot-Dry-Crap-Weather has been good for only one thing...Helping with the SecondaryScab War. Just please don't spray when it's so hot.... but Captan80 is the product to be lookn at.

Mildew kinda likes this CrapWeather also.... As long as we are growing more new foliage, Mildew will keep trying to screw it up.
