Happy T.G.I.F-Day !!

...A Brief Belated Explanation.... Awhile back....

I said I was going to send out FRNotes to Individual-Crop-Groups.... With pertinent Info for a Specific Grower-Group....?? But then at our Mid-February Meetings, at least a dozen guys, from South to North, [maybe 20 ??] asked me to include them on "All-FRNs-Sends"saying they had stuff going on with other Crops besides what I know about themthe Group-List I had them on....??

So I havent concerned myself about the plan to segregate.....

The Down-Side??? My Row-Crop Pals are maybe gettn bored with all the commentary on Apples & Blues????

I welcome your Input--Feed-Back....

Pals.... Please Ponder.....

*****There's a very**

Low-Cost-Effective-Pesticide-Tool that is 'Non-RUP' and very User-FriendlyThat helps as **Protectant & Eradicant** for apprx 60 different Bacterial and Fungal Disease Pathogens in about **135 different Crops** including all Cane & Brambles, all Tree-Fruits, All Veggies and RowCrops and Forage Crops and Small-Fruits....andIt actually helps clean your equipment as you use it... And it works Systemically on all the above Crops, getting into the Plant tissue and helping to stop or suppress all the Cankers and Blights and Phytophthoras and Mildews and Scabbies and Limb-Rots and Black & Brown Rots and Blotches and Spots and Others..... And only Costing from **\$4.88** up to **\$13.00** At Use Rates from 12 oz....on up to 32 oz--Acre.

This is also huge for helping with 'Streptomycin-Resistance' scenarios I'm Talkn about "**005**" ...from **MagnaBon**.

There are *no other* copper-products on the market today that are actually truly Systemic....None.

No Blue Paint all over your beautiful new \$134,000 Sprayer & Tractor Rig....

No sludge in the bottom of the tank

No Screen & Nozzle Issues

No crud in the bottom of the 2.5ga.Jugs to try and rinse out

No crud in the bottom of the 250 gallon Totes

..... "**005**" is Amazing.... and hugely more effective than the old 'Sludge-Coppers'....

Remember Dr. Jim Adaskavich - U--C.Davis Trials on the "Copper-Resistant" strain of Blight....he knew the Disease was Resistant, but he put our "**005**" and a couple more Coppers into the Trial anyway. The "others" had more Blight than the Un-Treated-Check-Rows.... while our "005" delivered nearly 100% Control of the Blight Attack. That is of course why Dr. Jim helped Fast-Track our Registration in CA..... which is normally worse than a foreign country for getting registration.

******27,000,000**Is the number of **USDollars** Agrinos spent acupla Years back on the new Research Facility in CaliforniaRight next to U-C-Davis....Staffed with several very serious Researchers ...Most with that "Ph.D." thing following their Name.... These Agrinos Products Supply & Increase & Stimulate Soil-Microbial-ActivityHuge.

Most of you have been hearing, and some of you have witnessed, what the big deal is with these Microbe-Expansion-Practices.... and some have witnessed and personally experienced the many theories and product-choices out there...???

Some of my Blues Friends have poured hundreds of dollar\$ per-acre-year into this effort. That is why we got involved.

Just as we suspected, this is truly-actually only a \$35-\$55 USDollar per-acre-year project....not \$200 - \$250.... and with our Agrinos stuff, we get huge results..... while some of the expensive choices deliver a bunch of smoke-mirrors-Bull-S__t.... and the products are ridiculous to work with as far as Application. Ours Tank-Mixes with what we are doing... Requiring no 'Special-Trips'....And it really does what Aginos says it will do.

Agrinos has 3 Products we really really like.... *InVigorate, *B-Sure, and *Agrinos 5-0-0All OMRI-Listed and Washington-State-D.A.Reg'd-Organic Use.

Whenever somebody is bending your ear about "'Soil-Microbial-Activity'" ...or anything that sounds close to that ...???. Please call us. Please.

Hoping You have a Safe Fun Weekend....It won't be Long and the Frenzy will be UnderWay !!!r
