Fruit Ridge Notes - Friday - May 18th - 2018

Happy Friday.... Sweet Fancy Moses ...These Weeks are Just Blown By ...Way to Fast

It Seems like only Day-Before-Yesterday I was Sayn "**Happy-TGIF**"

*****Getting Lots of Chatter**About "**SAver**" ... I really Appreciate that ... Good Stuff....Here's some more Info....

SAver is the Hi-Tec-Nutritional that has many very seriously Important "**Inert**" Ingredients....

It's basically a **2-0-10**But systemically puts some critical-components into the Trees-Plants radically fast due to Proprietary-Inerts...and

.....One of these Top-Secret-Inerts I have permission to disclose/discuss is known as **Salycilic Acid**... which also... is the key-component in other Bactericides sold down-the-street...for what **equates to \$40 - \$50 - \$60-per-Acre Cost to You...the Growers!!!!**

Our SAver is less than \$25-Ga. and you only use 2 Pt--3 Pint-Acre.... So... **\$6--\$9-per-Acre**....and gets you the equiv-\$50-amount of the Salycitic Acid It's just very po\$itively "**\$mart-Money**"!!

Also...You can Tank-Mix with CS2005 and K-Phite ...or Formula-II-SW if Ya want.....There's several Guys doin that for FireBlight right now.....

I'd be putt'n this stuff on all Varieties. It Tank-Mixes with all of our Fave Stuff... I seriously recommend **SAver** on any-all-Crops where there's Bacterial-Disease-Concerns.... All Stone Fruits and several Vegies.... Blues ...GrapesEverything. What a Bargain !!!

*****Another T.Load--CS2005** just came in...Matt is putting it away now... We were down to our last Pallet when this TLoad hit the Dock... Very Cool. Deanna and her DeeTeam are gettn really good at this stuff.

*****Looks like we have plenty of Chlorothalonils**....Echo....Bravo Type products.... I keep hearing it's so short.... ???? DeeTeam is sell'n the heck out of it.

*****Just Visited with a very huge Blues-Grower....He's** going to get big-time into the **Redox**-Program.... He has watched the very fun Success at the Neighbors across the street....

And, he just found out from the major BNR where he was gonna get his Granular-Bulk-N-P-K-Plus-Micros-Traditional-Blended-Fertilizer-Product ...??? It was gonna be \$1000-per-Acre.... Probably 3 - 4 Times what he needs for Redox stuff to do a way-better job than he's been getting with the old-fashioned-way....

*****Q & A OMGolly !!!.....**Thanx so Much for Reminder **Yes....** The other **NovaGib**-Look-a-Like-Products **Still** have 6 Times-as-Much of that ugly Gibb-A7 in their Formulation as compared to **NovaGib !!!** NovaGib is the Cleanest !!!

Remember that the GA7 is the naughty GA that burns into your "Return-Bloom" potential for next Spring...??? The same crap that was in the old "Accel"product...?? Before Maxcel???From way back in the old days when that Company got sued so bad they sold out to Valent...???

All the GA4-Products like NovaGib still have 6-Times more GA7 in their Formula than NovaGib.... And when your goin out there 3 or 4 times, applying the GA4+7 to Golden and whatever other Varieties to prevent Fruit-Finish-Disorders...??? That's certainly enuf Applns to screw up your Return-Bloom... and that also reminds me Did Ya'll remember that the Original "'BA-Thinner'" is actually Exilis...??? Maxcel is the Generic.

Hoping You Have a Blessed WeekEndr
