## Fruit Ridge Notes - Thursday - April 26 - 2018

**Hello Again .... Feelin so Blessed !!! .....For Here - Ridge - Still No Apple-Scab-Infections !!!**

*I see out in Wayne County NY...the Largest Apple Producing County in the U.S.....*

*They are very for sure in their Number 1 Scab-Infection for 2018....and its kind of a bad one.....*

\*\*\*\***Here---Ridge---Lots of Green.** A bunch of Guys covered up with their 1st - 1 Qt.Appln "**005**" ....

On the Road a bit Yesterday... What a HeartBreaker seeing some very Hi-Dollar-Tractor-Sprayer-Rigs all painted solid Blue...so Ugly....so pricey to clean that crap up...Hi-\$\$-Maintenance.

And then also the "**005**" is so much more effective against all Diseases than the old sludge coppers have ever been..... Todays Researchers say no comparison ...Hands-Down....

All of the 'Up-To-Speed-Contemporary-Researchers are lauding the "**005**" ....

\*\*\*\***Alicandro just reminded me....** that even tho the CapToZeb 'reaches-back' 24 Hrs, it '*often works better when applied prior to the Rain-Fall-Event.*' Also...I just had a visit with a CapToZeb Fan when he pointed out to me that Captan is cheaper than its been in 15 Years...????!!!!??? Feelin Blessed ....

\*\*\*\***Talking with Guys** doing \*Apples \*Cherries \*Grapes \*Nectarines \*Peaches \*Pears \*Plums \*Prunes..... All gearing up for **Maxing-Out** their Legal-Season-Limit on Chlorpyrifos4E... generic Lorsbans. There's lots of Names for these various Generics... Most are Labeled for use very Early... most @ at 2 Qts-Ac.

My main message is....

\*\*To use it....

\*\*The Fed is gonna take this one sooner than later...

\*\*It's very Low-Cost when considering all that it does--Very Broad-Spectrum-Hard-Worker...

\*\*Its a RUP--Be clear in your Official-Recording... DoubleCheck Label...

\*\*Again I say, Max this one out very much.... 2 Qt-Ac.on most Lebel....

\*\*It has been the most Butt-Kickn-Comprehensive-Insecticide ever developed....

*And...Using Oils with Liquid Lorsbans has been a very ugly common*

practice....??? Oils for most Guys...Year In--Year Out... is the 'root of a bunch of evil' ... a bunch of unwanted situations ....and it is totally unnecessary. I highly recommend *avoiding any Oils always*. When you consider all the hassles and precautions...the Do's & Dont's... it is most certainly not worth it, when its so easy to just do 3-4-Pints-per-100-Gal.-*InSpray-90N.I.S.*..... and I'll bet its *way less cost than any Oil*-recommendation is gonna be....

*Whenever* someone is trying to get you into any 'Oils'.... Just say OakieDokie... but *then grab your Jug of InSpray90*.....Like at Petal-Fall...with Abamectin....??? 3-4 Pints-100g-InSpray.... Same goes with the Lorsbans4E's ....

Nope....**No Blueberry or Apricots** on the Lorsban-Chlorpyrifos Labels that I can find.... Sorry.

**\*\*\*Indicate 5...is a Water** Conditioner....ph Reducer ....SequesteringAgent .... LightWeight-SpreaderSticker .... This is a serious Miracle-Drug when we are Tank-Mixing 8 - 10 - 12 different Fungicides - Insecticides - Thinners/PGRs - Bactericides - Miticides - Nutritions - BioStimulants and more...All into the same Tank. It just makes all of them play nice together and behave.

Most of the time we have something going into that tank that really wants some Hi-Tec-Top-Shelf-90-10N.I.S. like *InSpray-90*. It is very common for Guys to be doing 1 Pt. **Indicate5** and 1 Pt. *InSpray90*--per-100-gal-Water.

**RidgeRunner** is a very Hi-Performance-SprdrSticker-pH Reducer-SequesteringAgent-WaterConditioner-N.I.S....

.....and guess what it's made from.... ??? Its Half & Half !!!! .... Indicate5 and InSpray90.... I seriously cannot think of a Tank-Mix-Scenario where I would need any-thing more than what Indicate and InSpray90 can do....??? I never need any AmmoniumSulfate....no other adjuvants.

**\*\*\*Some Row-Crop-Pals** say the Top-Soil is still to Cold ....and with lots of Soft Spots....

Here's Hoping You All have a Safe & Fun WeekEnd .....r
