Fruit Ridge Notes - Tuesday - May 1st - 2018

May Day ... May Day ... May Day !!

... I Can't help it.... I've Always like sayin that on May 1st....

According to some Reports, it was actually Warmer in Traverse City Yesterday afternoon than in Kent City ...???!!!!

....Scratchn my Head here Today is supposed to be the warmest of the next 7-8 Days.

*****MustangMaxx....Huge** bargain Indeed.... Labeled for about everything.....Works great.... Less that [\\$4-ac.at](#) Full-Rate.... **ButVery Important....Huge...**

Please remember that this is one of our most absolute Best-Tools against S.W.D.s....and we really need to wait til SWDs are really a Killable-Pest before using any of our Legal-Seasonal-Limit of **24 oz.-Ac.**

Most all Crops have a 24 oz-Limit. and most Per-acre-Rates are at 4 oz.... So, we can legally do 6 Apps @ 4 oz.-Acre in most Crops.

Remember also that some other great Insecticides have the same Zeta-Cypermethrin in their composition, and that also **Counts against our Total-Legal-Seasonal-Limit**.....Like another of my fave products "**Hero**" ...is one of those.

Just about **always** where you see in the **E-154** where they are recommending Mustang Maxx, you will also see its listing ButtKickn choices like LambdaCy1EC [\$2.45-Ac.] and BaythroidXL [\$3.50-Ac.] and AsanaXL [\$6] ...lots more.

So---Save your M-Maxx til you really need the '**Shorter-Days-P.H.I.**' that **MustangMaxx carries**....against the miserable-low-life-SWDs.

*****I See in the Featured Technology** section of Alicandros **agr.news** a reminder about using **VitaZyme**.....

It was at least 10 - 12 years back when **Alicandro** called me one day and said... "**Reister...Ya gotta look at this stuff.**"

....Since then of course KaHundreds of you along with myself have been very impressed with the VitaZyme Attributes we appreciate with *Strong-Buds-*Return-Bloom & *Fruit-Set & *Pressures & *Brix.....and Over-All-Plant-Health.

We use just 1 Pint-Acre...and do our Applns at *Pink--*Petal-Fall--*1st Cover--*20 Days Before we Pick. And ...a bunch of Guys also do a Post-Harvest-App.....

I like that ...

I Highly Recommend a Post-Harvest-App for additional-strengthening of that Fruit-Bud for next Spring.

A very key thing to remember about VitaZyme...No other product on the Market has these 'Active-Agents' ... No other Product has the Field-Tested-Proven-Benefits ...There is absolutely no Substitute for VitaZyme.

VitaZyme has been really rollin for over 20 Years.... Thousands of Side-X-Side-Trials....Thousands.....World-Wide.

******Deanna just gave a List of over 30 Products that we - RGSs - promotes, that are OMRI-Listed....**For our Organic Production Pals... Wow...There's some seriously Cost-Effective-Butt-Kickers on the List. It really is a whole new Ball-Game compared to trying to produce Organic-Goodies 10-15-20 Years back.... There's a bunch of the Products on this List that the Conventional Guys use a lot of because they work so good....and Cost-Effectively....

******Indar2F....Yup---**Still a pretty DogGone effective S.I.... It may indeed be the strongest of all the Old Sterol Inhibitors...??? Labeled for just about all of you Guys..... ??? Except I can't find Pears or Grapes on the Label...??? Kinda strange.... Grapes have every S.I. known to man labeled for use, except Indar2F....???

.....Common recommended Rates = 6-8 oz-Ac.... around \$16-\$17-Acre.

Best Regardsr
