Fruit Ridge Notes - Tuesday - May 8th - 2018

Warmest Greetings from Up Here on the North Side of the John Deere Place.....

Hope Your Week is Off to a Gratifying Start ...???

Sounds like a Significant Chance of **Rain** later Tomorrow.....About an 80% chance...???

******I see in the MSU-Extension-Tree-Fruit-Update-May 7**----That all the Likely Suspects are Indeed Out & AboutWaiting for us to feed them some Chlorpyrifos4E and some AsanaXL.... Amy suggests that the ExtendedForeCast sounds like a bit Cooler than average.... ???? So... Possibly meaning an elongated stretch between Pink-Poison and the Petal-Fall-Killm-Dead-Window....??? She agrees we need to really whack these Suckers & Chewers hard.... right now.

Alicandro says messing up your Pre-Bloom-Poison Opportunity is seriously committing to spending way-huge-more-U\$Dollar\$ later..... For right now....I'm liking the 4 Pint generic Lorsban4E plus Full-Rate of a fave Pyrethroid.... Total-per-Acre-Cost apprx \$22...??? Later on you can do a much-less-Broad-Spectrum-Pesticide for \$45-\$60-per-Acre.

******We do Indeed Stock and Deliver** all those High\$\$\$Product\$ that I always Warn you about....??? Yup---Whenever You Need them.... And almost every time considerably cheaper than 'down-the-street'....

Some guys get backed into a corner and feel they absolutely must use one of those newer Chemistries to get out of a jam....??? What I always preach is trying to avoid the \$50-per-Acre stuffby using the \$2.80 stuff Tank-Mixed with the \$4.44 stuff earlier in a more proficient timely manner....and then come back and 'touch-up' with some \$3.75-Ac. stuff.

******Some of my Tart Cherry Grower Pals** are not very optimistic about probable Market this Summer....???

....Making it kinda tough to look seriously at that relatively new Labeling for Retain....for Yield-Enhancement...??? The apprx Input-Cost = \$220 - \$250...???

....And the extra 2500 - 3000 Lbs.Tarts may be about \$550.00??? **Thats if** the GoIn Price is around 20 Cents-Lb...???
