## Fruit Ridge Notes - Blues - Friday - July 13th - 2018

**Greetings Faves ..... Good Grief !!! It's Supposed to be almost 90°F again Today !!!**

**Hopefully we get some of that Rain they're talkin about for Tomorrow ...!????!**

**2 Weeks Hence.... 27th .... Fruit Ridge Fest .... Here Under the Big Tent ....**

**So.....**

**\*\*\*\*Best Tank-Mix for Pre-Harvest the Blues Boys .... Total-Broad-Spectrum-Lowest-Cost-Extreme-Effective.....**

In the Tank-Mix-Per-100 Gallon....

1 Pint Indicate 5 plus 1 Pint InSpray-90

Per Acre--For Wherever We Have **14 Days.PHI....**

9.6 oz. AsanaXL

8 oz. Lannate90SP

1 Qt. CS2005

10 oz Abound[azoxy2SC]

1 Pint VitaZyme

Plus Nutritions.... 1 Lb. RxSupreme and 2-3 Pint MainStay S.I.

Then... As our Days-PHI tightens up.... I would keep in every Tank....

3.2 oz Acre Imidacloprid[Provoke/Nuprid 4F] = 3 Da.PHI, and they want 7 Days between Apps of this one. You're allowed 5 Apps of 3.2 oz-Season.

12 oz Acre CS2005 = 0 Da.PHI

I'm **not** depending solely on the Imidacloprid for SWDs... So ....

Into the same Tank with the Imidacloprid ... **Alternating**....for SWDs ....

1.33 lb.Ac. Imidan **3** Da.PHI 24 Hr.REI Use 1.33 Lb.-Ac. Allowed 5 Apps-Season...No mention of Days-Interval-between-Apps on this.

4 oz. Ac. Mustang Maxx **1** Da.PHI 12 Hr.REI Need 7-Da.Interval between Apps ....6 Apps per Season

6.4 oz. Ac. Brigade[Bifenture2EC] **1** Da.PHI 12 Hr.REI Allowed 5 Apps-Season Needs 7 Da. between Apps

.....Lookn at this ...you see there's 16 total Appln-Opportunities here.... So that if you needed to spray every 4 Days, there's enuf SWD Kill-Power for 64 Days.

I like this  
part.... M.Maxx=\$3.60 Bifenture2EC=\$3.85 Imidan=\$13 .....  
=Cost-per-Acre

....and Imidaclopris = \$2

What One of these Appln-Tank-Mixes Looks Like.....

...the 1 Pint-Ea-per-100g....

Indicate

InSpray-90

....and Per Acre:

4 oz. Mustang Maxx

3.2 oz. Imidacloprid [Provoke or Montana or Nuprid]

16 oz. CS2005

1 Qt. FormulaII-SW or K-Phite

24 oz. MainStay S.I.
