Fruit Ridge Notes - Monday - July 9 - 2018

Wow....July 9 Already This Week Is supposed to be a Week of Normal Stuff.... Just Same-Old-GittRDunn Kinda Stuff....

Some Blues Boys are starting Harvest in the Holland-Muskegon Area....All the Blues Boys in the SouthWest Michigan Geographic have been at it nearly a Week now.... And a lot of Cherry Guys are really rollin now as well....

Only 2 Weeks from this Coming Friday is the "'Fruit Ridge Fest'"**July 27** ...

Right here at **14050 Fruit Ridge Avenue**.... under the Big Tent ... Lots of great Food & Fellowship & Fun & Michigan Brewski's and Wines and Music All to Show You All how much We Appreciate Your Friendship and Your Business and Your Support & Patronage Can't Wait to See Ya'll !!!

****** "N"...What about "N" Source** With our Redox Products Programs...??!?!?? ...There's so many Guys now that 5 Years ago stopped using all of the traditional-conventional-N-Stuff like Urea or Ammonium Sulfate....???

Great Question -- Very Important Concern....And this is where the Real-Deal-Science really plays kinda rough with my Old-School-55-Year-Experience-Methodology-Mind-Set.... You can learn some intricate-pertinent-in-depth-details referencing this when attending our Info-Share-Meetings in the Off-Season...But.... **For now.... a couple of Thots....**

~~**All** of the Hi-Tech-Redox-Nutrients containing big doses of Hi-Carbon-Micro-Bio-ReActed-Ingredients that cause huge-Increases in Plants-Nutrient-Uptake and in Soil-Microbial-Activity enabling the Plants-Trees-Bushes-Vines to source their 'N' thru natural-processes ...like right out of the Soils and from the Air, as 78% of the Air we breathe is Nitrogen....And also out of the Soil-Matrix whether you put some 'N' there or not.... Keeping in mind the Rain-Storms we get from our Almighty deliver us many Tons of 'N'

~~**Ponder....** When we consider the huge dark-green-lush-Forests.... and All the other really Green & Growing places & examples you can think of where nobody is ever out there broadcasting any conventional N-P-K-Granular-Fertilizers....and they never have been.... We realize that the Vegetation is getting all the Macro & Micro-Nutrients they need all by themselves....Naturally.

The Redox Technology is the Real-Deal-Science....and the first Research-Development-Scientists to bring us a Line-Up of Products that are so easy to use. Some of the other Nutrient Folks that are on the same thot-track have their Growers going thru all types of Hoops & Maneuvers to try to get their Products to do what they want.... some ridiculously inconvenient crazy preparations and special trips across the Fields.

But.... We all know if we're gonna manipulate that Plant for Increased-Every-Year-Production, we need to make some adjustments.

Yes...You have indeed seen and heard me say where we like to use some '*Spoon-Feeding' of CalciumNitrate* in some scenarios... For Sure. Like where you couldn't get enuf Galas off with the Spray-Thinners... and the Hand-Thinning Crew should have grabbed a few more...??? We like to 'Spoon-Feed' 15.5-0-0-19Ca into that Weed-Control Strip... like 40 - 75 Lbs-Ac...Depending on TreeSize & Crop-Load.

Redox....The Proof is in the Puddin.... Whatever Crop we get into.... Redox is the Real-Deal...and almost always the very best R.O.I..... Sometimes it is just incredible and unbelievable... the Yields and Quality Increases we see.

Another 'N' Consideration.... a Very clean-low-salt-Hi-Efficiency "N" product I highly recommend.... **GreenFeed-27-0-0** Very Impressive...Comes in 5 ga.Pals... Use 2 - 3 - 4 - 5 Qts... Depending on what Crop.... Again...Just Spoon-Feeding....Great Response....Excellent Results.

Another really successful trick is to melt-down your Cal.Nitrate...Use as a Foliar...for the Direct-Hit of Calcium onto the Fruit. We can also source for you a Liq.Cal.Nitrate. ******Yup---FoliCAL** does come in 30g.Drum\$...Save\$ Ya \$ome seriou\$ Dollar\$ in the Drumsand that **Ridge-Cal.BPC.PhitePlus** with the **Zn and SeaWeed** in it....also comes in Totes....Huge \$aving\$Great Calcium Products.

******Take a Sec and Check out the Label on the AgrianWebSite for "'Establish'"** Another Product from "Custom-Ag-Formulators" Establish has the Cold-Processed-Norwegian-SeaWeed and Liquid-Humic-Acid.... It has a good reputation for Tank-Mixing and Playing-Nice-with-Others.... But it doesnt like really Low-pH-Tank-Mixes.... Like if you're doin Asana and getting your Tank-pH down to 5.5...?? ...Maybe wait for the next ride. We have Establish in Stock.

******Make that Note on Your Calendar....July 27**

And Hopefully You all have your Rooms for the Great Lakes Expo, if Ya wanna stay over-night there...???? Those Rooms are usually gone by about a month back when I first mentioned it... **Have a Blessed and Safe Week !!!!r**
