Fruit Ridge Notes - Tuesday - July 10 - 2018

Another Balmly One at 17 Mile & Fruit Ridge....

Yup I heard all about it from my Kids here... In last Fridays Fruit Ridge Notes I referred to Mares Tail Weed as "Mayors Tail"My Bad.

Many Experts are warning all of us about Sunburn-SunScald on some of the Hi-Dollar Varieties of Apples..... There are some very Easy-Clean-Qwik-Cost-Effective methods to handle this. 616.887.9933 616.678.7706

*****Q & A...Yes...Now that you mention it...** I indeed would prefer to do 3 Qts GreenFeed-27-0-0 acupla times.... as a Foliar ... and keep up with my Calcium Applns..... And Not do the Gran.Cal.Nitrate.... I think I would be hard-pressed to see any advantage on the the Rows where I used the granular Cal.Nitrate. The cost is likely about even...?? But the Granular needs a special trip... and GreenFeed Tank-Mixes fine with most everything

I've never done a Side X Side ...but I know this GreenFeed is a really serious effective "N"Source...

..... and I really really like the Cal-Nitrate.... but the GreenFeed just makes huge sense...from every aspect.

*****Q & A... Yup--"Establish" --** Mentioned yesterday.... 1-2 Pints-Acre-Foliar...3-4 Applns.... as many as you want.
As a Soil-Ground-Appln... 1 Qt - 4 Qt - Ac.... One appln with your Redox-Nutrition. Establish is less than \$30-Ga.... Very good deal...Huge Performer.

And **No...Not** the same as VitaZyme.... There's exactly nuthin thats the "same-as" VitaZyme..... Nobody can ever "copy-cat" that one.

*****A Bunch of Boys** crankin up the Irrigation.... Hard to believe that only a few select areas got that 4 inches of Rain 10 days ago !!!!!!!

*****Bitter-Pit-Susceptible Varieties-Apples.....**If they are Hi-Dollar...??? You really need to be in on that 2-3 Pint-Ac-**MainStay-S.I.** Calcium....every 7 Days.

******For Sure... This coming Winter-Off-Season....** There will be several opportunities to learn all about the Hi-Tech-Science explaining what all these Guys are seeing with their Redox Nutritional Program..... I know...right..?? Crazy.... Not using any old conventional N-P-K-Granular-Stuff--Zero [-o-] ...????
.....Saving a ton of money getting out of all that old-school stuff.

******Q & A...Correct...Very Important.... Hero** on **Blues** for SWDs... It has MustangMaxx in it.... **So.....**

We're allowed 46 oz-Hero-Ac-Season ...But if we also use MustangMaxx, then we have to cut back on the Hero. But....Nobody I know will try to do the maximum of either one.... You can safely-legally do 4 Apps Hero @ 8oz-Ac....and also 4 Apps Mustang Maxx @ 4 oz-Ac.

And...Hero also has Brigade in it....

******SanJoseScale.... 1st Generation Crawlers---**Control-Window----About to slam shut.

If I'm not concerned about delivering to Gerbers, I'm using 1 lb Diazinon[\$8] Tank-Mixed with 6 oz **Endigo**[\$9], which has Warrior and VoliamFlexi in it.... Never Use any Oils of any kind...ever. Just do your pint-100-ga.Indicate and 2-3 pint-100-ga.InSpray-90.... Do Not spray when its real hot-strong-Sun. Endigo has a 35 Da.P.H.I....24 Hr.REI

******Still no Bronzing or any ERM**-Issues in our A-Mek/Abba/Abamectin + InSpray-90 Blocks.... Keepn our fingers crossed with all of this 88°F crap....

******Wherever You** are keeping a serious Nuke in your Tank-Mix you likely wont see any major BMStinkBug-Build-Up.... And all the Guys I visit with that are seeing no Aphids are always keeping that \$2-worth-Ac-of Imidacloprid [Provoke-"Nuprid"-Montana4F] in their Tanks.....

******Blues Boys** should be getting 1 Lb.-ac.-**RxSupreme** into the Tank-Mix this Pre-Harvest-Appln on most Varieties Also consider 1 Qt-Ac-**MainStay-SI-Calcium**...that makes the Fruit notably firmer and discourages that Female SWD from cutting into the Berry. Ya'll remember that research data out of Oregon State....

Warm Regardsr
