Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Friday - August 10 - 2018

**Hello and Happy TGIF to All Ya's.....  
Another Warm One Here ...**

**\*\*\*\*Yes--Those really High-Tec-Extreme-Quality Pickn-Buckets are called "YieldMAX" ...by Harvest-Wear ...They are a 1 Bu.Size... It looks like we are down to 8 or 10 of those left.**

And....We have several of the Light-Weight Neoprene--36 Lb.Buckets....Very Popular....and about \$50 less.

**\*\*\*\*Lots of Retain goin out the Door....** We are being told that when we order more our Cost will be higher.... ☹

**\*\*\*\*Experts concur with what some of You Guys have told me ...** About Summer-Pruning the Honeys ....It has not & *will not* reduce incidence of Bitter-Pit. The Vegetative-Shoots have already sucked a bunch of Calcium away from the Fruit.

...and Alicandro claims that excessive-Summer-Pruning can actually reduce Fruit-Size.... and the 'Winter-Hardiness' of the Tree. The key is to not get to ruthless. He says to keep the Summer Pruning Crew on De-Caf.

**\*\*\*\*Q & A.... Yes--Those Peaches** in the 10-Acre-Apple-Trial-Block..... **Yes** I have mentioned in the very recent past how nice all of it looks... and I am referring to the Foliage and how it relates to 8-10-12 Apps of CS2005 and several of the other Apple Pesticides we are doing. All looks good....

But, those Stone-Fruit-Trees are really getting crowded-out by the Apples...to the point where it's killing some limbs-etc. And I see in some of the Peaches that Linda has harvested have some Insect-Stings-Injury....

But I do have some Blank-Spots in the Block and can make room for more fun Varieties of Peach--Plum--Nectarines--Cots--Sweets--Etc.... Thats why I'm asking for some help getting in on somebodys Tree Order for Spring-2019....

We're on the Web!

See us at:

[www.reisters.net](http://www.reisters.net)

**\*\*\*Please Check Out "Reisters.Net" and see the Photo's** of this past July 27 "Fruit Ridge Fest" ....Some very Cool Classic Cars and Tractors ...Very Cool.

On Reisters.Net you can see where to go directly to a bunch of our Fave-Manufacturers-Web-Sites..... and also all of these Fruit Ridge Notes are archived on the W-Site. You can also go to the "Agrarian" Site and look up a Product. If you mind me sayin it...Our Reisters.Net Site is kinda Cool.

**\*\*\*Surfactant-Adjuvant...with Blush 2X ...** You want 1 Qt-100ga. InSpray-90...if you're just doin Blush 2X. If you are doing a few other Pesticides you are likely doing the Indicate 5 in that Tank Also.... You still want the 1-Qt-100-Gal-InSpray-90. If you have Retain in that Tank...??? You can add a little Silicone Surfactant, or just go to 2 Qt-100-Ga.-InSpray-90.....

Happy Weekend ..... r
