Fruit Ridge Notes - Monday - July 30 - 2018

Greetings from Fruit Ridge Avenueon Beautiful Down Town Kent City West Side.....

We Hope You All had a Great Weekend ...

Some of Us were Blessed with a Qwik-Dust-Settler.... ???

Some say it came down really hard-fast.... ??? ...Not so Much by us.

******It's almost "Retain" Time** ... Please Check with Deanna as to availability & price....

******In Apples...Bitter Rot--Black Rot--White Rot--Secondary Scab--PinHead Scab[same as PinPoint]--FrogEyeLeafSpot--Phytophthora.....** Are some of the Diseases the Experts tell us to be On-Guard for in Summer-Time-Cover-Sprays ...

Pressure from, and possible Control Measures for **Cedar Apple Rust** was likely over+done-with in your Orchard apprx 2-3 Weeks back. And **Mildew** should be about done unless you have had a really bad bout with it.

I see in the E-154, Ziram is recommended for several of those Targets at 6-8 Lb-Acre [\$28].... That stuff costs about \$1-Lb. more than Captan80.

For all of our Disease Concerns right now, I'd be doin **4** Lb.Captan80 plus **4** oz. Rally [\$23-Total]...and if I had any Secondary Scab out there, I'd be doin **5** Lb. + **5** oz. The performance Rating for these in the E-154 has "E" and "G" for most Targets for these 2 Chemistrys. The only thing I've seen work as well or better than that Combo is the "**1-2-3**" ...which also delivers some Nutrition for you. The only hitch is the Secondary Scab.... Almost gotta have Captan for that.

******Phytophthora...Collar Rot** Ur Kiddn me.... Some Folks are really actually still recommending Aliette80WSP for this...???!!!!??? Wow... after reading up a bit on this, I see the *Medium*-recommended 3Lb.12oz.-Rate-Ac is recommended for **3** Applns... which cost totals out at about **\$144-Acre-minimum**.

Many many Pals have proven to themselves and me and everybody watching, that 3 Applns of 3 Qt.-Ac. of our SuperPhite at 10 Da.Intervals will actually do the job better-faster... **Applied as a Foliar... **Radically Systemic ... **Tank-Mixes with everything.... **Neutral pH.... and **Phites gradually convert to a Nutritional-Value Cost is from **\$46.50 to \$64.50** total for the **3 Apps**.

We're on the Web!

See us at:

www.reisters.net

Our **SuperPhites** include **K-Phite** with the EPA-Bactericide-Fungicide-Label.... and our Nutritional-Labels==**FormulaII-SW** wSeaweed & Zn, and **Formula I**, and **Black Label 28-25** ... These ranging in per-acre-cost from about \$17.00 - \$21.50-per-Appln. And.....Have you ever read the label on the Aliette??? It appears it's barely even compatible with itself. Another Cost-Prohibitive-Pain-in-Neck-Terrible-Nuisance Option is the Ridomil.... Requires a whole separate-Soil-Drench-application-extravaganza... Not goin there.

******BMSB....I see Warrior/LambdaCy is Rated "E"** on the Marmorated Stinkers.... and the Imidacloprids are rated 'G'There is plenty of Chit-Chat about some newer Compounds to kill BMSBs at a wide-variation of crazy-per-acre-costs, but your \$2-Ac-Worth 3.2 oz.of Imidacloprid and a 5.12 oz-ac. LambdaCy [21 Da.PHI] at \$2.00 should do nicely.

******All Applications of All-Pesticides and All-Nutrition**should be able to be done thru your Weed-Spray-Machine into that Weed-Control-Strip.... and from your Foliar-Sprayer onto the Plants-Trees-Bushes.... Life can be made simpler... and it can cost much less while we're at it.

***** And **Thanks Again** to All Ya's that were able to make it to our Fruit Ridge Fest ...It was sure Good to See You All....

Talk Soonr
