**Hello Grower Pals..... Wow... Just hit 90°F here ... "Feels-Like" 96\* ....**

**SunScald--SunBurn remain pressing Concerns ....**

Please inquire about **Parka** and our **PurShade**...

**\*\*\*\*Hearing all Very Good Things from Our Blues Pals ....** They seem to be Kickn-Butt on the SWDs----Quite handily .... But this Hot-Weather is not helping anybody.

**\*\*\*\*BMSB...==....** Somebody couldn't find the '**Glossary**' ....and was 'drawing a blank' .... **== Brown Marmorated Stink Bug ....**

Some very Good Operators with very good Sprayers are finding some Damage .... Looks kinda similar to early Bitter-Pit-Symptoms.

Lookn at Pgs.115-116--MSU-E-154 at those Rated **"E"** ....

Lannate 1 Lb.Ac. -- 14 Da.PHI -- 72 Hr.REI Apprx.\$28

Danitol 18oz.Ac. -- 14 Da.PHI -- 24 Hr.REI \$26

LambdaCy/Warrior 5.12oz.Ac.--21 Da.PHI -- 24 Hr.REI \$1.65

Leverage360 2.8oz.-Ac.-- 7 Da.PHI -- 12 Hr.REI \$4.60

Endigo 6 oz.Ac. -- 35 Da.PHI -- 24 Hr.REI \$9

That Glossary I had in the Fruit Ridge Notes is from **July 24**. All FRNotes are archived at our Site **Reisters.Net**.

And.....Please....

**Check Out** the cool **Photos** from our recent Fruit Ridge Fest Event there on Reisters.Net. Pls note the Photo of our Alicia with her GrandDaddy - **Lupe**....He worked for my Dad when I was 12 yrs old... I think Lupe was 17 - 18 yrs.old when he started helping Dad and Bother Bob....early 1960s. Thats Lupe's Bride Maria in the blue in the Photo right next to Lupe-Alicia.

**\*\*\*\*I got a Guy Askin....** So I checked around with the Manufrs ....

He is gonna go ahead and do this Tank-Mix on Gala soon...

...for SunBurn-Scald-Prevent ....for Color Enhancement ...For Early-Drop-Control... For SootyBlotch ....FlySpeck, actually all Diseases ....some Nutrition .... Improved Fruit Finish ....

He is using 60 GWA on this Block based on his TRV-Calculations.... with these Per-Acre-Rates of These ....

**5 Pt.Parka ++ 7 oz.Retain ++ 1 Qt.Blush 2X ++ 3 Pt.OxiDate 2.0 ++ 3 Pt.Formulall-SW ...**

*He says the 5 Pt.-Ac.-Parka is all the Spreader-Penetrant-Surfactant he needs for his Blush and Retain. He is getting 110+% Coverage.*

He already has his 1st-Appln-Blush on these Galas....and also 2 apps Parka earlier.

I told him that should all work very fine together... and Not to go in the Heat .... and not to cipher his per-acre-Cost of this Appln.■■■■ OoooWeeeOw.

But ....He knows he has to have U.S.Extra Fancys....

**\*\*\*\*OBLRs...???? Ya Gotta get 115%% - 130%% Coverage.....** Drive Slow and Soak'em. Alicandro says forget it... to save your time & money....

But the Chemistry Choices are Cheap enuf.... Like MustangMaxx--Rated **G - E** ....\$3.50

**\*\*\*\*Peaches are Lookn Great .....** In most cases.... Not so Much in our Test-Trial-Apple-Block ....Not so good.... Quite a few Stings. But of course we never targeted any "Peach-Pests".....

The Pears are lookn real good in there yet. Last year I had PearPsylla kinda bad.

**\*\*\*\*How is it Lookn at Your Place .....**Time-Frame-Wise.... for your PreHarvest VitaZyme-Appln...??? It's always best to get the VZyme on just before or better yet just after a Rain. Looks like a good chance of some precip here Thursday.... 1 Pint-Ac---Tank-Mixes with everything. 21 - 30 Da.PreHarvest is about perfect.

Because of this recent brutal-drought-heat-fiasco... Most all of the real-deal-VitaZyme Guys will be doing a Post-Harvest-VZyme-Appln.... As soon after harvest as they can....  
..... Less than \$8.... huge Benefit.

Best Regards .....r

**P.S....That Shelby-Cobra**-GT-Mustang you see at **Reisters.Net** has over 600 H.P.... Ken Reisters toy....
