FRUIT RIDGE NOTES - WEDNESDAY - AUGUST 15 - 2018

.....Wow Many of Us would really like some of the Soggy-Orchard-Floor Issues

our Friends in Wayne County N.Y. are Dealing with right now???

.... After 3"-4"-5" of Rain....????

Before this they were just as Dry as as we are.

******Looking for More** We've heard some Fun & Encouraging Feed-Back from some of the Blues Boys that have been using the "Avian-Control" product for preventing the dastardly Birds from robbing them of their Profits. We would really appreciate some more....Our Avian-Manufacturer Pals are always looking for Testimonials.

******Yes....**I think I recently mentioned that the Da.P.H.I. on CS2005 is Zero-[-0-] Days....Except on Peaches and Hops.....

...and **Yes, You can** if you want to add 1 pint to that Tank-Mix mentioned yesterday with the Parka and Retain and Blush 2X -- Etc. The "005" will help the OxiDate 2.0.....Huge help.

And a very *Good Question*....about the pH....Some of those pricey Products dont want you to mess with your Tank-pH. They like it Neutral ... But 1 pint "005" in your 60 GWA equates a 1:480 Dilution-Ratio, which I dont believe will be any problem. But I appreciate your concern...."005" Right-out-of-the-Jug has a very low pH.

*****Tart-&Sweet Cherry Guys**Are getting busy with their Post-Harvest-Appln.... I have heard all the stories from Top-to-Bottom about how bad the 'Pay' is for the Cherry Guys....??? Pretty ugly for some of Ya's..... So Let's stick to the Basics. Let's keep this "Post" at the lowest-cost-possible and still achieve what we need to for Diseases and Tree-Health.

Rate -- Acre -- Products

1 Pint	VitaZyme	
2 Qt	Formulal or Formulall-SW or BlackLabel28-25 orK-Phite	
1 Pint	CS2005	
12 oz.	BoronXtra	
3-4 Pt.	ZincRush9If Ya wanna get any Fancier that that, pls let me know.

******Regalia...One of the Best "SAR" Products.....** Yes....The Tree-Fruits---Cane & Bramble Crops ---Vine Crops---All Green & Growing Crops will continue to '**Suck-In**' that Regalia chemistry for weeks yet. Regalia remains one of our best Disease-Control Tools. I am so seriously happy for our Organic-Production-Guys that use a lot of Regalia....the Stuff works.

"**SAR**"...??? Translates = "**Systemically Acquired Resistance**"When a specific Product-Applied can trigger activity inside that Plant to rev-up it's own Self-Defense-Mechanisms.... Another acronym sometimes used to describe a very similar....*almost identical in all charactoristics* 'Mode-of-Action'.... "**ISR**" ...Translates = "Induced-Systemic-Resistance". Whenever we can, we diligently scrutinize these types of Products... I really like the concept. You have seen-heard me recommend-endorse a few of these

And... you have seen-heard me *trash-talk* some of these when the Manufacturer-BNRs want to charge you **\$55**-per-Acre for a 1.5 oz-Rate--like as in ActiGard. Talking you out of some like that helps send a message to the BNRs & Manufacturers ...about their "'Acquired-Stupidity-Resistance'" needs.... If almost nobody buys it, they'll lower the Retail-Cost.

******The Redox "Fruit-Coloring" Program** is of course a very nice and timely and significant jolt of Nutrients that the Tree needs/wants for ample vigor & sustenance. The actual "Red-Coloring-Advantage" the Redox-Guys are enjoying is simply a Bonus-Side-Effect. They have already more than covered the cost thereof by not wasting all the Big-Bucks on the old traditional-conventional-granular-NPK-methodology. So Bottom-Line is....

It's All About the U.S. Extra Fancys.... Guess what some of those Redox Guys are also doing.....????
....Blush 2X @ 1 Qt.-Ac..... an entirely different approach to getting that very significant additional Color advantage.... This Fall-Winter-Apple-Sales is going to be a real Contest when looking around at the Worlds Apple-Producing-Regions all having a really big Crop.

U.S. Extra Fancy is the Number-One-Goal... That will actually pay some Bills.

******If Any of You Have any Empty Totes** or Pallets setting there that you received from us with Products, and you wish they were not there, Pls let us know. Some of those Totes have a Deposit that we do not pass on to our Customers because we almost always get them back. Let us know...??? Thnx Huge !!

Hope You're Stayin Cool.....r
