Fruit Ridge Notes - Friday - September 21 - 2018

Greetings on this "'P.O.W. & M.I.A. Recognition Day'"
.... And Tomorrow is Officially the 'First Day of Autumn'

~~~In all the Spits & Drizzles & Squirts in the last couple days,  
we got 6/10ths-Inch at Gooding St.

Early yesterday it really came down for a few minutes.  
To Doggone Windy today.... Lots of Apples Hittn-the-Dirt ...

\*\*\*\***As You All Know.....** The No.1 Most Effective **Mosquito-Killer-**  
Product on Planet Earth is Chlorpyrifos.... But .....

I cannot see a way for you to do that Legally...??? Even the "Trunk-  
Sprays" are 28 Da.PHI with a 4 Da.REI  
There is a "Pyrenone Crop Spray" ...Labeled for Mosquito in Apples  
.... Zero [-0-] Da.PHI... 12 Hr.REI. Use 12 oz.-Acre. Deanna is trying to  
source some..... No idea of what it costs.

\*\*\*\***Once Again ...The Results** are becoming apparent, that those  
Guys that had the best Worm Control....SJS Control....Disease Control ....  
are those same Guys that drive the slowest when spraying.

\*\*\*\***Q & A ... Nope...The Marine-Bio-Stimulant** we like to add into  
the "Blush 2X" Tank is not VitaZyme.

The 2 SeaWeed Products we have for that, and really like are the  
'Establish' and the 'Kelpak'.

I do think there may be a small amount of a SeaWeed-Type ingredient in  
VitaZyme...Not sure what. VitaZyme is a speacial creature all by itself.  
There is no other.... Not even a "Look-Alike" that can compare in  
performance.

**But** you are seriously running out of time for your Blush....You want  
around 25 - 35 Days for that to get you the most **Red**-Return on your  
Investment. Unless you doin some old-Strain-Fuji I'm thinkn your  
window is about slammed.....???

\*\*\*\***Next Week Wednesday ...** Sept.26th .... is the **M.B.G.** Bus Tour  
Gig ....

\*\*\*\***Questions on Applying "'N'"** to Orchards **Post**-Harvest....

I'm not a Fan, but I do like a Tickle....just a tickle.... which is all you need  
for that next-years Fruit-Bud to appreciate it.

---

We're on the Web!

See us at:

[www.reisters.net](http://www.reisters.net)

I like that GreenFeed27....@ 3-4 Qts.  
There's no way that Tickle does any Long-Term Delays in early  
Winter-Tree-Shut-Down.

**\*\*\*Q & A -- I.D....** You really need to Identify the Nutrient in  
Question.... *Before* you dump it in the *Post-Harvest-Foliar* Tank-  
Mix. You need to know for really sure the Quality-of-Ingredients....  
and try to recollect if it caused you any Tank-Mix-Grief 'In-  
Season'....

When in doubt, save it for a Weed-Control-Tank-Mix. You can get  
away with a lot of Ugly in those Tank-Mixes, especially when using  
the right "Blendex" type Adjuvants.

**\*\*\*I See the Gals** Posted our *Fall Hours* on the W-Site very  
recently ....

We really do have a pretty cool WebSite .... Reisters.Net

I look forward to that time when you all have a minute to catch  
your breath and can maybe look at our Reisters.Net. Lots of stuff.  
Just Point & Clic.

**Have a Safe Weekend.....r**
