Fruit Ridge Notes - Wednesday - September 19 - 2018

Hi Friends Hopefully we Escape this Thrs-Fri-Rain-Threat

www.WunderGround is saying 50% Chance...
And....After Friday we are supposed to be getting a bit more Fall-Like Temps.

******Post Harvest Applns-Apples ...Are** In my Opinion.... Primarily for **Improved-Return-Bloom-Strength and Fruit-Set** for May-2019.

I always calculate 'Production-Costs' per Bushel. The more Bushels the less the Production-Costs.

When calculating how much of whatever goes into the Tank for application, it's all "Per-Acre"But at the end of the Season, all of my Costs are divided by the Bushels.

In the Blocks that Cropped real heavy right now, we give those Trees a 'good-poke' of all the right stuff 'Post-Harvest' In those blocks that were very light right now...not so much...just a tickle.

******The Goal is to Eliminate the "Biennial"** Aspect of the Crop-Set. We want to successfully 'Chem-Spray-Thin' every May.

******I Recall in 'agr.news'** for many yearsEvery Fall....Alicandro talks about Post-Harvest-Apps for *Return Bloom and *F.Blight and *Apple Scab I distinctly remember whenever he talks about the Diseases, he always mentions "**005**" first.... Always quite gratifying for me 😊

******Just Visited** with a Row-Crop Pal ...Big Acres He says they have Zero Complaints Things are really lookin good.

******Pumpkin Grower Guys...???** If you're having any issues with **SunBurn...???** Check with me ...or Deanna

There's some Guys saying they found a new Trick---Nutritional-Product....

The DeeTeam here says I wouldn't have the snafus with my E-mails if I weren't trying to send these FRNotes to 850+ Recipients all the time. I'm trying to think of a way to shrink my list to eliminate those that don't read it Still scratchn my head on this one....

Best Regardsr
