Fruit Ridge Notes - Wednesday - September 5 - 2018

**Hello from Kent City's West Side Quite Breezy here...
Unfortunately more Rain ForeCasted... That Radar kinda
supporting that ForeCast.**

Hope All is Well where You are

*****Apples ... SJS....San Jose Scale ...** Yeah, It is a truly ugly mess... and Amy mentioned the Control-Window is closed now.... She made a great suggestion to make a very bold & emphasized "Alert" message to Yourself about all of the SJS-Hot-Spots....for **Early 2019**-Control-Strategies.
SJS is not that hard or expensive to get rid of.... we just gotta really make a targeted-effort.

*****CS2005 on GrapesYes..... 0 [Zero] Da.PHI..... 48**
Hr.REI... You don't need over 12-16 oz. to help against the Rots & Mildews. Very Cost-Effective..... \$5 - \$6. And the Super-Phites are always a superb Tank-Mix-Partner for "**005**" ...Like **K-Phite and FormulaII-SW** ...

And ...

Several Guys still do the "**1-2-3**" for Disease Control in Grapes....the **1** Pint "**005**" plus **2** Pint Regalia plus **3** Pint K-Phite/Formula II-SW ...and some are very pleased where they have added 8-10 oz-Ac. Prevam **Prevam** is the ORO-Agri product that is getting significant accolades. Read up on MSU's favorable Prevam report in **E-154-Pg.33**.

As is true when Spraying any-all Crops these Crazy-90°F-Days....Start very early mornings ...Be done by 10am. Grapes are a bit more sensitive to some Products than other crops...?? I know Prevam will heat-up the Tank-Mix somewhat....as it really increases Control-Success in Insect and Disease Targets.

Q & A **CS2005** as a Stand-Alone...??? Hmmm But why would I expect a \$5.75-Ac-Effort to get the job done Completely...??? But.... if I'm using 125 GWA and 3-4 pints-Ac.**CS2005**...?? I'm betting big it would do the job just fine. Keep in mind **005** is Systemic.... It does so much more than most give it credit for. And that would be only 1/3 the Expense of a Pristine App.

That 4 pint rate wouldn't exactly be legal... and there are some Varieties that may not like 4 pints...??? ...even in 125 GWA.

******Retain ...for Bleeding....**

That Appln on the really Red Romes to stop that Internal Red-Bleeding Don't be late with that Appln. Try for 28 - 35 Da.PreHarvest.

******Yup.... "PinPoint"** and PinHead" Scab ...Same.

******Alicandro** claims that "'Moses was the first person to use a Tablet to Download Data from the Cloud.'" ☺

Have a Nice Wednesday Eveningr
