## Fruit Ridge Notes - Tuesday - Nov.27 - 2018

**Hey Faves .....** High 20's and very Cloudy & a little Snowy here ... Ridge....

We are all very busy gearing up for the Big "Great Lakes Expo" next week Down-Town Grand Rapids ....

**\*\*\*\* Q & A ...** "How did your Worm-Control with all of your Low-Cost Insecticides work in 2018 in your 10-Ac-Apple-Trial-Blocks"???

The Qwik-Answer== "Not to Bad ....But in late August in one Block a bunch of new stings were showing up."

For the complete Real-Deal Answers and intricate Details of what we know we can get away with... and what we can't,...???. ...Be sure to make it to our Booth at the G.LakesExpo and/or the NWMO&V Show.... and most certainly for sure to one of our "Winter Meetings" February 26th or 27th or 28th.

**Related**---Alicandro recently mentioned..."The Apple Spraying Season is certainly not getting any shorter...Primarily due to Internal Worm concerns; but now also due to the arrival of BrownMarmorated Stink Bugs."

**\*\*\*\* Some Folks ...** Not too many ...had quite a lengthy aggravating and serious battle this past Season.... Some with Scab, but most with Worms and SanJose Scale.... **and** Woolly Aphids. Jeff Alicandro says the same for out there in Wayne County New York.

I cant wait to tell you about how there were not any SJS or Woollys ...and less than 0.001% Scab in our "**Sprayed-Dirt-Cheap**" 10 ac.Trials...

**\*\*\*\*The Tarts & Sweets & Plums & Nectarines & Peaches & Apricots** that are InterPlanted in one of our 10-Ac-Apple-Trial-Blocks, are close to 20 Yrs-Old.... and really getting crowded out by the Apples. We are needing to InterPlant some more of each of these. So..... Please keep us in mind if you are Ordering Trees including any of these....?? We're not to fussy on Varieties.

Incidentally .... Those Stone Fruits only ever get Pesticides that are part of our Apple-Trial-Program ... Lots of Cheap Insecticides and Lots of CS2005 .....

And they all seem to really like it.
