Fruit Ridge Notes - Thursday - October 1st - 2020

Hey Friends.... Wow.. 1 pm - Another 41/100ths....and Still Drizzln... ☹️

ButWunderGround now showing decent to really good SunShine for next 8 of 9 Days starting with tomorrow.
The average Highs and Lows ... 56°F and 42°F..... More Rain Sat.PM and Sunday.

**** **Most Apple Guys** have their final-pick done now with their Honeys...Some have already done the **Motivate** [Ethephon] Appln on... It's best to get that on as soon as possible after the harvest. Be very careful of "Off-Target-Drift-Contact" with other Varieties still hangin. And remember the Ethepons W.P.S.Field-Posting is required during Ethepons 48 Hour REI.... and Motivate and all Ethepons have that same EPA Requirement.

Alicandro says he likes the Motivate App back in Mid-July... and this should be your 2nd Motivate Appln for Return Bloom on Honeys. Remember this Motivate is only like \$25-Gallon...??? The use-rate is 1 - 2 Pint-Acre...depending on TRV... Make sure to add your Nutritional-Package to this...

And...I see where Alicandro has had impressive results with this 'Post' App on Greening... EarliGold... JonaGold... Goldens... Crispin and Spy.

******New--Young--Non-Bearing-Tree-Fruits...**

The Final Appln of the Season...??? Done already...??...Great !!

For all tree-Fruits.... This is a great Tank-Mix Recipe...

If you haven't... Its a great time to GittRdunn as you are doing your other "Post-Harvest" stuff.... Some Guys goin on New-Young-Apples with VitaZyme[or BioShot], Warrior, Imidacloprid, "'005'", Formula-II-SW, DiKaP, TriplexMicro, and GreenFeed-27. When you finish your 'Dial-Down' for your TRV....your per-acre co\$t on all the above 'Tank-Mix' is gonna be less than \$20-Ac on that Young Stuff. They deserve it.

**** **Lets Visit ... After You get your Harvest Over...**and get your accurate Inventory of your Spray-Shed-Shelves... Lets talk about a Fall-Herbicide Appln. We can get a bunch of that stuff into the Tank-Mix.
