Fruit Ridge Notes - Monday - April 27 - 2020

Monday Morning Greetings from Reisters Hoping You had a Good WeekEnd...

The Sun has been trying to have a Say-So in our recent DayTimes.... Appreciate every Minute of it
Chance of Rain tonight...?? ... Looks like Bigger chance late TuesPM...Big Rain Wednesday... 😞 😞

But... 5 of Next 9 Days look to give us a bit of SunShine...with 3 of 9 with Rain.

Some stiff Breezes in that ForeCast I'd be *Goin* when the *Goin* is *almost good...??*

These Rains ...along with the ForeCasted +60+Degree+Temps will move Bud-Stage-Development right along

So....Considerable New Growth we need to really get serious about ... 😞

****** Some Spots will see "Pink"** comin on soon...This Week ...

I always hear 1st from the Guys with the South Slopes--Sandier Soils--Earliest Varieties...

****** Q&A...The "SA" in SAver** 'Salicylic Acid' ... or 'Salicylate'

....

😞👍 This only gets a wee bit confusing because "SA" is a "SAR" "SAR" is a product that triggers Disease Resistance on the part of the Plant.... that is a Resistance-Defense from the Plant[or Trees] own Arsenal... *'Systemic Acquired Resistance' = "SAR" ...*

.... SA is just one of the many various SAR trigger-products...

Many Hi-Tech-Nutrition products are SARs Several of you Guys are now telling me you have been reducing your Frequency & Rates of "Pesticides"due to your Over-All Plant Health Strategy being so profoundly robust.

"SAR" Products do not kill Disease Pathogens They work Systemically They dont 'wash-off'... They do Work..... Just Please do not get talked into some of those that cost \$50-acre... 😞 😞

And most Guys dont ever use these "SARs" as a "Stand-Alone" Disease-Control-Approach ... Not yet anyway.

******Right ...Yup....** On that **Minecto Pro** *If* I'm doin that I'm certainly doing 2 - 12 oz-Ac-Apps. And that's the Maximumand it also means I then *cannot do any AgriMek/Abamectin.*

But....Take a moment ... Double-Check my aforementioned Exirel Cost...?? It appears you can maybe \$ave \$ub\$stantial on the Exirel component...???

...Minecto Pro has a 28-Da-PHI and Its a RUP...
MSU-**E154** says it is **"E"** on *CM.. *ERM.. *FruitTreeLeafRoller..
*GreenAphid.. *GreenFruitWorm.. *OBLR.. *OFM.. *RedBanded..
*Rosies.. *WALH.. *STLM.. *TwoSpotted.....and Rated **"G"** on
*A.Maggot.. *P.C.. *Rust Mite....

So... 😞Gotta look at it, right...??? But... But But

But Also Look At "Endigo ZC" For Full-Rate=**\$10-**
Ac-6 oz-rate???

Has all the same MSU-Ratings !!!!!!! Endigo is made from
Warrior and Actara

\$10-Ac.... Guess what I'm doin

You can legally do Four of the 6 oz-Applns Endigo ZC ... But I
dont necessarily recommend all four ... regarding Resistance...
We have Lots of other very good & viable choices....Xxtreeme Low-
Cost-Hi-Efficacy Choices.

****** Deliveries...Yup...Still Runnin** South

Tuesdays.... Wednesdays to Oceanna County Hood.... Thursdays to
the North

****** And Yes....** Before You ask **Besiege 112SC** ...

Made with **Altacor & Warrior** ...

Look at Efficacy Ratings = Pgs.116-117--MSU.E-154 ...Lots of
"E" and **"G"**

Use **3 - 10 oz-Ac-Apps**-Season-Maximum... 21 Da.PHI---24 Hrs-
REIfor like **\$22**-App...???
