## Fruit Ridge Notes - Friday - June 19 - 2020

**Wow.... Another Friday ... Hey Wait...Didn't I just Say That...???**

A very real Indicator of Age... 😊 😞 ...and Experience... 👍 😊

**Another** Wow..... **WunderGround-10-Day**..... Saying T-Storms-Rain--Off & On--Sunday-Monday-early Tuesday.....and then again late next Friday-Saturday-Sunday. Pray for All our Grower Pals ....Asking for Protection from Damaging-Storms.

It certainly appears so far that our very Cool Awesome God is Blessing us... 😊 🙏

\*\*\*\* **Q&A...Great Questions....** Referencing **SWD** Control with OxiDate **5.0**...

Attention All **Blues & Sweets & Strawberry** Gals & Guys....

**5.0** Helps Remove the Yeast from Berries...which Deters Adults-Egg-Laying because

that's their Food-Source....Also allows Insecticides to be effective longer

**5.0** Burns the Air-Sack from the Egg...Killing the Egg. !!! Huge !!!!

**5.0** Helps Huge with "'On-Contact-Kill"' of Disease Pathogens....Helping against

BrownRot, Anthracnose, P.Mildew...More...

Lots & Lots of you have Pals & Associates in the PNW.... **5.0** is a very commonly-

used "'Staple"' there...Blues & Sweets...

Washington Blueberry Commission says **5.0** consistently improves Any-

-All-SWD-Insecticide Applns.....Alot....

Ask Your PNW-Pals!! Please... Spread the Word... !!

This stuff is Xtream-Low-Cost-Hi-Efficacy !!

Rates---I wouldn't go less than **3-Pint-100 Ga**....

....You using 75-80 GWA-on-Sweets...???

**\$10 - \$11-Ac**... 👍 😊 🙌  
And... You can go up to 3-4 **Qts-per-100-Ga**---if Ya want.

\*\*\*\* **SWD Killers... Yup**...Those "'**Roids**" are Always by far the Cheapest.... Like Avg=**\$4** compared to some other Craziess exceeding

**\$45 - 😱 \$70 - 😞 \$100-Acre**... 🤔

But...

Also....Be very careful...Pay attention to any-all those Products that are Combo-Chemistries... like Hero...??? If you do Hero ya gotta calculate 😞 how much Bifenthrin and how much MustangMaxx you used and then make sure you don't exceed those Seasonal-Limitations.

Some Guys just Tank-Mix their own...??? Yup... I would too...

\*\*\*\* **Imidacloprid 4F .... Yes for Sure** positively Gotta Do this Stuff... 5 Applns of 3.2 oz-Ac-Season-Limit---Anytime in any Summer Covers... This does such a huge [Job-Description-List of Pests](#)....and its only like **\$2.60**-Ac-App... and Not-RUP...

Ask the DeeTeam which one is Legal for You in Michigan or wherever you are... Lots of **4F** Choices...Lots of weird critically variable Labeling... 😞 😞

This also helps against SWDs *Waaay* more than Folks give it credit for....and Jap Beetle... and it Kills all Aphids.

\*\*\*\***Reminder...In the Past...** I have had Several Ya'll report reeeaaally great Results with 4-Pint-InSpray-90 -100 Ga-Water with AgriMek... Guys that use even more...like 5-6 Pints-100 say even more amazing... Legally...??? The Label says 4-Pt-100... not more...

I would never ever go over 4 Pt-InSpray-90-per-100 Ga.Water.... Absolutely no need ...4 pints works great. Never had any Reports of any Phyto...ever.... even from those Boys exceeding the Label-Limit. A HoneyCrisp Grower Pal just reminded me of the Hugest BNR from down-the-street that had a almost kinda similar Surfactant-Product and recommended some really Big-Rates on a certain project with their fave "Surfactant" ....a few years back... and had a huuuuge Phyto mess. Of course their "'Fave'" was certainly Not of the Premium-Quality-Inputs that InSpray-90 comes from. 😞

Stay Cool....

Remember ...**Our God Wins**....

*May our Awesome God Forgive this Culture ...and Heal this Land*

.....
