Fruit Ridge Notes - Tuesday - September 8 - 2020

Greetings Friends....Hoping You All Enjoyed Your Labor Day...

West of Sparta... Some Very Nice Little Showers OverNite....

3/4th-Inch at 10 am...

Radar lookin like almost kinda decent chance of some more Precip... the WunderGround Folks also saying kinda decent chance on thru tomorrow. We are still behind quite a bit on Precip....

This cloudy-cold-54°F reminds me more of a October 8th... 😞

The **10-Day** lookin at 7 of 10 with plenty of Sun...

Avg-Hi-Temp==71°F....

Avg-Lows==52°F

.....Actually quite nice for Ol'Fat Guys that readily OverHeatlike me..... 👍 😊 🍷

****** Yes--Blush 2X ...**Yup...Gotta have some **InSpray-90** in that Tank....

1 Qt-per-100-Gallon... **Cheap**....Gotta do it.

And yes the 'Activator-90' and the 'Regulaid' do the same thing... they work great...They just **cost too much**.

And **Yup**.... I see Jeff-"agr.news"--again reminding his Disciples that the Blush 2X is like twice as potent as the original Blush.... and... to wait til you get a bit of natural color before applying Blush 2X....

And maybe Call Jim Kruger--FineAmericas--517-719-0323. He'll make an appointment to come and see Ya with the DA-Meter....

****** OnGoing Discussion...**Yes... Those ReTain Applns for 'Water-Core' in Red Dels and 'Internal-Bleeding' in Romes indeed need to be made earlier than other ReTain-Target-Uses...25 Days for Water-Core..... 32 Days for Internal-Bleeding...

****** Some Fave Blues Boys Reporting phenomenal Yields....**

Where their Regional Reports are quite un-Impressive...due to early-Season-Temps...??? ...Reporting like 4-5000 Lbs.-Ac...??? My Favess gettn 16,000+++Lbs... that being on top of 15,000++++Lbs last Season...same Fields... They are seriously lovin their **Redox Strategy**.

Also ...the List of Guys claiming much lower Conventional Pesticides usagelike 50% of their "Old Normal"????....that List increasing.

And of course the Redox Guys \$aving Huuuge because of not wasting \$ooo much money on the Ol-Do-Nuthin-Conventional-N-P-K+Micros-Traditionals..... They have "Stopped-the-Bleeding" ...One Guy said he can't believe he kept on doing the things his Dad and Grand Dad complained about for 100 Years... enduring painfully dismal performances...just kept on doing it... They are Sooo Happy he found Redox.... Yup... We are too !!!

******Blues---Post Harvest Nutrition...**One Guy just shared he is doing a Foliar and a Soil-Applied... Per Acre...

Foliar--24 oz DiKaP ...plus 24 oz.OxyCom Calcium... plus 24 oz.CS2005...

....plus 48 oz.Formula-II-SW... plus 16 oz.VitaZyme

Soil-- 16 oz-of-Each--DiKaP & Rootex & H-85

These "Post" Apps are really important for next Years Cropping...especially where you have used a Mechanical Harvester....Huge for Carbohydrate Storage and Root-Flush. If you dont have any more VitaZyme, use BioShot...2 - 3 oz-Acre...

**** **Q & A...** Yes...I have had several Apple Guys share with me that they Reeeeaally like their Tank-Mix of ...

*Half-Pouch-ReTain... plus*24 oz-DiKaP... plus 1 Qt.Blush 2X...for Getting that Xtra Bump of good Red Color.

**** **Gotta Be OnGard...** Against SootyBlotch & FlySpeck.... Seriously...Cool.... Wet.... 😞 😞

Looking at my Meetings for later this week.... Gotta do some Road-Work...

In & Out ...

....the DeeTeam will stay in touch...If Ya need anything--616-887-9933

Some more very Drizzle right now...Outside here at my Home Office...

Warmest Regards...

Locked & Loaded....r
